Hearsall Common, Coventry	COV Hearsall Lane, Coventry	140 SP317786	Air:Airfield	A	Hearsall Common is the location where jet engine inventor Sir Frank Whittle first experienced the power of flight. He flew kites here and saw an aircraft land in 1916. There is an urban myth that the aircraft blew his hat off and a plaque on the common shows this! He lived close by in Newcombe Road.	0375
Midland Air Museum	WAR Coventry Airport, Rowley Road,	140 SP355751	Air:Airfield	O	The Midland Air Museum – located adjacent to Coventry Airport – has 45 aircraft on display, some in the hangar, others in the open. The Museum also houses the Sir Frank Whittle Jet Engine Centre, and has a display on the history of aviation in Coventry.	0257
Signpost, Birmingham Airport	SOL Outside Terminal 2, Birmingham Airport	139 SP183838	Air:Buildings	V	Originally located at the entrance to Elmdon Airport, the signpost was moved to its present site in 1985 to commemorate the first-year anniversary of the opening of the new Terminal Building.	0209
Terminal Building, Elmdon	SOL Off A45 Coventry Road, Elmdon	139 SP170835	Air:Buildings	V	The original terminal building for the Elmdon (Birmingham) Airport by architect Nigel Norman and engineer Sir Graham Dawbarn, opened in 1939. Innovative design with 50 ft. (5m) wing canopies on either side of the round-nosed main structure. Period detailing together with coat of arms of the City of Birmingham. With the opening of the new Terminal in 1984 the original terminal concentrated on freight transport.	0208

Nelson Club, Warwick	WAR Charles Street, Warwick	151 SP295656	Animal:Gelatine	V	A Club provided by George Nelson Dale & Co. (gelatine manufacturers) for its workers and thei families, opened in 1883. Designed by Frederick H. Moore, it included a theatre/dining hall, library and reading room plus billiard room, bagatelle room and amusment room. Now much changed internally, the frontage to Charles Street remains largely intact. Attractive red brick two storey building with brick and terracotta detailing, including 'AD 1882' and 'THE NELSON CLUB'. Still functions as a club.	0161
Nelson Village Housing	WAR Charles Street & All Saints Road, Warwick	151 SP295659	Animal:Gelatine	V	Housing built by George Neslon Dale & Co. (gelatine manufacturers) for its workers and managers at the end of the 19th century. Interesting cement block construction. Managers' housing located in road now known as All Saints Road (previously Charles Street)	0159
Nelsons Gelatine Works	WAR Wharf Street, Warwick	151 SP293657	Animal:Gelatine	V	Some of the remaining buildings of what were the extensive works of George Nelson Dale & Co., gelatine manufacturers at Emscote Mills, Wharf Street, Warwick bounded to the north by the Warwick & Napton (now Grand Union) Canal. The firm was founded in 1837, moved to Emscote in 1841 and was in production until 1972. The various buildings are now used for a mix of light industrial and commercial purposes.	0160
Wall Crane, Roebuck Inn Wk.	WAR Priory Road, Warwick	151 SP286651	Bldgs. Ancillary	A	A wall crane mounted on the rear wall of the Roebuck Inn in Priory Road, Warwick. To service a hay loft. A 'gallows' type structure with a horizontal beam with pulley at the outer end which is bracketed from a vertical pivoted member mounted adjacent to the brick wall of the building. Supported by a digonal member. On the right hand side of and adjacent to a doorway at first floor level.	0364

Locke & England Pillars	WAR 12 Guy Street, Leamington Spa CV32 4RT	140 SP318661	Bldgs:Ancillary	O	Cast iron supporting pillars manufactured by W. Glover & Sons of Warwick. Located inside the rear of the building which may have been used for garaging or a coach house in the past. Visible anytime the auction house is open to the public.	0366
Goldfinger House	SOL Cranmore Boulevard, Solihull	151 SP129775	Bldgs:Architectural	V	Former offices of Carr Protective Paper Co. built in 1955 adjacent to the factory and intended as a prestigious headquarters for the company. Notable because of the architect Erno Goldfinger and the building is regarded as the first of Goldfinger's 'mature phase'. It has 'a clean crisp design, with a rhythm created by the regularity of its grid construction, expressed through the concrete frame and piloti,' Various occupants since the demise of the company, with the Chartered Institute of Payroll Professionals (CIPP) currently in residence.	0204
Research Building, Shirley	SOL Stratford Road, Shirley, Solihull	139 SP126774	Bldgs:Architectural	V	Originally built as the Research Centre for Lucas Industries in 1965 to the design of Clifford, Tee and Gale. It is a two storey building constructed in concrete, glass and brick, with a sweeping elongated front elevation, complemented by a projecting circular canopy with a flat conical roof resting on slender supports. Impressive internal design as well, with murals by George Mitchell. The landscaping was reputedly designed by Sylvia Crowe, an acknowledged expert in her field. The building is now (2015) occupied by TRW Automotive.	0205

Kendalls Mill, Stockton	STR Station Road, Stockton	151 SP446644	Bldgs:Architectural	V	Established by the (farming) Kendall family, it served the surrounding, mainly rural, community, utilising road, canal and railway connections. The mill dealt in coal and a range of agricultural goods including the processing of grains. The building continues this basic function today, serving as a Countrywide Store. It has been much altered but the upper floors contain evidence of its former life and the protruding hoist is a distinctive feature of the building.	0330
Millwrights' Arms, Warwick	WAR Coten End, Warwick	151 SP289652	Bldgs:Architectural	V	This long-established public house is the last remaining indication of the past industrial activity in this part of Warwick. The area was renowned for millwrights and wheelwrights and agricultural engineers.	0218
St. Barnabas Church, Kenilworth	WAR Albion Street, Kenilworth	140 SP293725	Bldgs:Architectural	O	A Victorian 'tin atbernacle' mission church clad in traditional corrugated iron material. Formerly known as St. Nicholas Mission Room. Services began in 1886.	0382
Stoneleigh Abbey Fountain	WAR Stoneleigh Abbey, Stoneleigh	140 SP320711	Bldgs:Architectural	O	Coade stone or Lithodipyra was stoneware that was often described as an artificial stone in the late 18th and early 19th centuries. It was used for moulding Neoclassical statues, architectural decorations and garden ornaments that remain virtually weatherproof today. It was first created about 1770 by Eleanor Coade who ran Coade's Artificial Stone Manufactory, Coade and Sealey and Coade in Lambeth London from 1769 until her death in 1821 after which it was continued to be manufactured by her last business partner William Croggon until 1833. The recipe and techniques for producing Coade stone have been rediscovered by the team at Coade Ltd. who now reproduce a range of Coade sculpture at their workshops in Wilton (Wikipedia)	0202

Cosford Aqueduct	RUG Oxford Canal NE of Rugby	140 SP503771	Canal:Aqueducts	A	Dating from about 1834 and built when the line of the Oxford Canal was being straightened. Carries the canal over a road. An iron trough 15ft wide spanning 23ft 6in, supported by four segmental cast iron arch ribs (renewed in 1991).	0019
Bearley Aqueduct	STR Near Bearley, Warwickshire	151 SP162609	Canal:Aqueducts	A	The second longest cast iron aqueduct in Britain. 14 spans of about 34ft. with a total length of 498ft. The waterway is carried in a cast iron trough with the towpath alongside level with the base of the trough. Engineer William Whitmore, completed in 1816.	0009
Wootton Wawen Aqueduct	STR Over A3400 road at Wootton Wawen	151 SP159630	Canal:Aqueducts	A	The second largest of three similar aqueducts on the Stratford Canal. Cast iron trough made up of twelve sections with bolted joints. Towpath level with base of the trough. Engineer William Whitmore October 1813.	0030
Yarningale Aqueduct	STR On Stratford Canal adjacent to Lock 34, Yarningale Common	151 SP184664	Canal:Aqueducts	A	The smallest of the three cast iron aqueducts on the southern section of the Stratford Canal and, unusually, situated immediately adjacent to a lock. Structurally identical to Wootton Wawen and Bearley aqueducts with a cast iron trough. Ironwork by Horseley Company. Dates from 1834, built to replace an earlier aqueduct destroyed in a flood.	0031
Avon Aqueduct	WAR Over River Avon on Warwick & Napton Canal	151 SP301655	Canal:Aqueducts	A	Carries the canal over the River Avon about 30ft above normal river level. Three masonry arches of 43ft span dating from about 1798. Built by Benjamin Lloyd, Moses Wilson (masons) and John Docker and Thomas Wilson (carpenters). Engineer William Felkin until 1796 then Charles Handley.	0042

Leamington Aqueduct	WAR On Warwick & Napton Canal where it passes over the GWR line between Leamington and Warwick	151 SP303653	Canal:Aqueducts	V	A cast iron aqueduct built by the Great Western Railway to carry the Warwick & Napton Canal over their line. Water is retained in a cast iron trough which is supported by six cast iron arches of unusual design. The ribs are cast as double cantilevers which engage with lugs cast on the bottom of the trough. Towpath is carried on external brick arches. Contractors were Peto and Betts and it was completed in 1852.	0035
Bridge No. 1 Coventry Basin	COV Coventry Canal Basin	140 SP333796	Canal:Bridges	A	Built in 1769 but altered subsequently as shown by the changes in brickwork. Interesting because it has no towpath, designed for security reasons to prevent public access from the towpath of the canal. Originally boats were not allowed to moor inside the basin at night and at dusk a floating beam was locked into position on the northern side of the bridge.	0350
Hawkesbury Junction Bridge	NUN Hawkesbury Junction, Bedworth	140 SP363846	Canal:Bridges	A	This relatively large bridge carries the towpath of the Coventry Canal over the entrance to the Oxford Canal. Erected in 1837 with a single cast iron arch of 60ft. span. Engineer John Sinclair, ironwork cast by Handysides of Derby.	0012
Oxford Canal Bridges 45 & 48	RUG Oxford Canal near Newbold, Rugby	140 SP481779	Canal:Bridges	A	The left hand bridge - No. 48 Falls Bridge- carries the B4112 road over the Oxford Canal. The right hand bridge - No. 45 - takes the towpath over the disused Newbold Arm of the original course of the canal built in the 1770s which was kept open for a period to Newbold Wharf. It is a cast iron arch bridge cast by the Horseley Company and erected during the straightening of the line of the canal in the 1830s.	0181

Rugby Wharf Junction Bridge	RUG Rugby Wharf Junction, Newbold,	140 SP502770	Canal:Bridges	V	A cast iron bridge carrying the towpath of the Oxford Canal over the Rugby Wharf arm. Built in the period 1829-34 when the Oxford Canal was re-aligned to shorten the line from the 1773 route. Cast by the Horseley Ironworks.	0292
Oxford Canal Towpath Bridge	STR Fenny Compton 'Tunnel'	151 SP433524	Canal:Bridges	A	Bridge No. 137A was built following the opening out of the tunnel on the Oxford Canal at Fenny Compton. It is a cast iron arch bridge which transfers the towpath across the canal. Semi-elliptical arch of 26ft 9in span formed from two half arch ribs on each side with a central bolted joint.	0026
Yarningale Cmn. Lock Cottage	STR Stratford Canal Yarningale Common	151 SP183663	Canal:Buildings	V	Known as Bucket Lock Cottage, this is one of small number of (unique?) barrel-roofed lock-keeper's cottages on the southern section of the Stratford upon Avon Canal. The barrel-roof reputedly derives from the experience of building arch bridges on the canal. A private house, it has been much altered and extended.	0318
Canal House, Coventry Basin	COV Coventry Canal Basin	140 SP333796	Canal:Buildings	V	Probably built in the 1840s to replace an earlier house which was demolished to provide new access to the basin via Drapers Field bridge. The house was used by successive canal managers. Now occupied by a children's nursery.	0349
Canal Warehouses, Coventry Ba	COV Leicester Row, Coventry	140 SP333795	Canal:Buildings	V	Warehouses serving the Coventry Canal Basin with roadside access from Leicester Row. The extensive frontage was built over the period 1787 to 1914 in four stages, reflected in the different styles, scale and roof heights. All in brick with slate roofs with interesting variations in arch entrances and windows. Warehouse at the southern end has COVENTRY CANAL BASIN painted on its front whilst the next door building has COVENTRY CANAL WAREHOUSE on the gable. Now converted for a variety of uses.	0351

Bridge Cottage, Hartshill	NOR Apple Pie Lane, Hartshill	140 SP329952	Canal:Buildings	V	Bridge Cottage adjacent to Bridge 31 on the Coventry Canal is part of Hartshill Canal Maintenance Yard. Built of purple-blue brick, the cottage is 2-storey to the road but 3-storey to the canal. On the canal side there is a wide low basket-arch which previously gave access to the wharf. It is now blocked off. Plaque on the cottage reads 'Take Notice: This bridge is insufficient to carry any weight beyond the ordinary traffic of the district. G.F.Twist Clerk to the Company. February 1892'	0106
Hartshill Maintenance Yard	NOR Atherstone Road, Hartshill	140 SP328952	Canal:Buildings	V	Maintenance yard on the Coventry Canal with covered dock and workshops in blue-purple brick, together with a distinctive clock tower. Canal side crane.	0104
Hillmorton Yard	RUG Oxford Canal, Hillmorton	140 SP538745	Canal:Buildings	V	Hillmorton Yard contains a number of features that typify the work of a small canal yard. In particular the dry dock and boatbuilders' facilities, various ancillary buildings and a former engine house maintain the scale and atmosphere of this important canal location.	0316
Kingswood Junc. Lock Cottage	STR Kingswood Junction, Lapworth	139 SP186708	Canal:Buildings	V	One of small number of (unique?) barrel-roofed lock-keeper's cottages on the southern section of the Stratford upon Avon Canal. The barrel-roof reputedly derives from the experience of building arch bridges on the canal. Located at the start of the southern section it is now a private house.	0320
Lapworth Lock Cottage	STR Dick's Lane Wharf, Lapworth	139 SP186699	Canal:Buildings	V	One of a small number of (unique?) barrel-roofed lock-keeper's cottages on the southern section of the Stratford upon Avon Canal. The barrel-roof reputedly derives from the experience of building arch bridges on the canal. An integral part of Dick's Lane Wharf, it is now a private house, much altered and extended.	0319

Preston Bagot Lock Cottage	STR Stratford Canal, Preston Bagot	151 SP177656	Canal:Buildings	V	One of a small number of (unique?) barrel-roofed lock-keeper's cottages on the southern section of the Stratford upon Avon Canal. The barrel roof reputedly derives from the experience of building arch bridges on the canal. A private house, it has ben much altered and extended.	0317
Lock Keeper's Cottage	WAR Old Budbrooke Road, Budbrooke, Warwick	151 SP266855	Canal:Buildings	V	The lock keeper's cottage at the bottom of Hatton Lock flight	0305
Lengthman's Canal Cottage	SOL Adjacent to Lock 31, Stratford on Avon Canal, Lowsonford	139 SP188677	Canal:Builings	V	The best example of one of the six barrel roofed Lengthman's cottages on the Stratford upon Avon Canal. Dates from 1812 and formerly occupied from 1926 by Ned Taylor, a canal employee who resided there for around 80 years. Currently a holiday let by the Landmark Trust. In 2015 a modern iron sculpture by Sir Anthony Gormley was placed next to the nearby Lock 31.	0309
Atherstone Locks	NUN Atherstone	140 SP300893	Canal:Locks	A	A flight of 11 locks on the Coventry Canal, with 5 concentrated in Atherstone town centre. The locks are unusual because they have sideponds to assist in the conservation of water. Some of these have been filled in, others no longer function, but the pond adjacent to lock 6 can still operate with paddle gear intact.	0273
Sutton Stop Lock	NUN Hawkesbury Junction	140 SP360846	Canal:Locks	A	Sutton Stop Lock is a narrow lock situated near Hawkesbury Junction Basin. It was built to prevent the Oxford Canal losing water to the Coventry Canal at the junction. The fall of the lock is only 7 inches. The original lockkeepers were the Sutton family from which the lock is named.	0362

Hillmorton Locks	RUG Oxford Canal, Hillmorton	140 SP537745	Canal:Locks	A	Opened in 1790, congestion on the Oxford Canal initiated the construction of a duplicate set of the three locks at Hillmorton in 1840. This created three pairs of two parallel narrow locks. The intention was that the locks would act as mutual side ponds, thereby saving water. Although no longer operational, the winding gear between the locks can still be seen.	0315
Knowle Locks	SOL Off Knowle to Kenilworth road	139 SP189761	Canal:Locks	A	A flight of five locks which are 14 ft. wide. Locks have side ponds (now silted up) and intermediate pounds. These lower the Warwick & Napton Canal (now Grand Union) 42 ft. from the summit height to 90m AOD (295 ft.). The original narrower 7 ft. locks can still be seen next to the wider locks. They were established in 1793 by Act of Parliament and in use by 1799. The wider locks were built in the early 1930s. A signpost reads: London 124 miles/Birmingham (Gas Street Basin) 13 miles.	0166
Hatton Locks	WAR Grand Union Canal near Hatton	151 SP250665	Canal:Locks	A	A flight of 21 locks which lowers the Warwick & Birmingham Canal (Grand Union) 147ft into the Avon valley. Originally built 1799 as narrow locks. Widened in 1932-34 for 14ft wide boats. The original lock chambers have been retained in most cases as overflows.	0032
Seeswood Reservoir	NOR B4102 road, Nuneaton to Fillongley	140 SP329905	Canal:Reservoirs	V	An early canal reservoir, probably the earliest when built in 1764. Supplied water to the private canal system at Arbury Hall built by Sir Roger Newdigate. Unusually there is a (later) lock through the embankment to allow boats to enter the reservoir. (Lock now disused and forming the spillway.)	0004

Earlswood Lakes Reservoir	STR Earlswood	139 SP113742	Canal:Reservoirs	A	Three pools which form a canal reservoir designed and built by Thomas Baylis for the Stratford Canal. Windmill Pool, Engine Pool and Terry's Pool. Windmill and Engine pools are retained by an earth dam 1,400ft long and 20ft high. A feeder channel runs from the dam to the canal. Top water level is only a few inches above the canal water level. The brick building at the north-east end of the dam housed a beam pumping engine installed in 1823 which worked until 1936.	0024
Napton Reservoir	WAR Napton Junction, Grand Union Canal	151 SP466629	Canal:Reservoirs	A	A canal reservoir at the junction between the Grand Union Canal (Warwick & Napton Canal) and the North Oxford Canal. It is used to store excess water from the North Oxford Canal to supply water to the Grand Union Canal on its way down to Leanington Spa. Used as a fishery and in the past by Automotive Products Sports and Social Club as its Dinmghy Sailing Club water. Old winch and concrete slipway remain.	0365
Arbury Hall Canals	NUN In the grounds of Arbury Hall, Nuneaton	140 SP366883	Canal:Routes	O	A network of private canals built by Sir Roger Newdigate starting in 1770. Seven separate canals can be identified including a link to the Coventry Canal together with the Griff Hollows Canal (1785-7). 13 locks on the system which extended for about 6.25 miles. The triple lock on the Arbury Upper Canal was Y-shaped with two sets of upper gates. Traces of the canals remain.	0018
Hawkesbury Junction Basin	NUN At junction of Coventry and Oxford canals.	140 SP363846	Canal:Routes	A	A basin situated at the junction of the Coventry and Oxford canals requiring a sharp U turn between the canals. Greyhound Inn at canalside. Stop lock on Oxford Canal just to the north of the basin. Junction originally sited about 1 mile south.	0072

Oxford Canal Rugby Wharf Arm	RUG Newbold, Rugby	140 SP501767	Canal:Routes	V	The Rugby Wharf Arm is 2 furlongs long and is now a dead end with a winding hole and joins the Oxford Canal at Rugby Wharf Arm Junction. Once the main line of the canal, it went as far as Newbold before turning north to join the present alignment of the canal by Newbold Quarry. Built 1773 but altered to an arm in the 1830s.	0293
Kingswood Canal Junction	SOL Lapworth	139 SP185708	Canal:Routes	A	The site of a 250 yard Link Canal built in 1803 to connect the Stratford upon Avon Canal to the Warwick & Birmingham (now Grand Union Canal). Originally the Link was accessed through a lock off the Stratford Canal to hold back water. It is now accessed through a cutting to a lower level basin. On this site are also examples of split bridges, two small reservoirs, maintenance and toll buildings and a barrel roofed lock ottage.	0064
Kaye's Arm W. & N. Canal	STR Long Itchington	151 SP422642	Canal:Routes	V	An arm of the Warwick and Napton Canal serving Kaye's cement works in Long Itchington. It pre-dates the Marton Junction-Weedon railway from which also served the works. The arm is now used for as mooring for a range of residential and commercial boats, but beyond the railway bridge it is still possible to see the head of the arm as it enters the cement works site.	0272
Nelson's Arm G. Union Canal	STR Stockton	151 SP442649	Canal:Routes	V	A canal arm previously serving Nelson's Lime and Cement Works. Currently (2016) undergoing major excavation and restoration by Willow Wren Training. The former route of the Marton Junction to Weedon railway line passes over the arm.	0325

Newbold Canal Tunnel (Old)	RUG Adjacent to the church yard of St. Botolphs Church, Newbold	140 SP484770	Canal:Tunnels	V	The bricked up south portal of the disused tunnel of the Oxford Canal. Situated in a field adjacent to the church yard of St. Botolph Church in Newbold. Part of the original route of the Oxford Canal engineered by James Brindley until his death in 1772 (succeeded by Samuel Simcock) which followed the contours of the ground. The tunnel was 125 yards long with a towpath built out from the wall with the water passing beneath. The tunnel was abandoned when the line of the canal was straightened in the 1830s. (See also Newbold Canal Tunnel Portals (0178 & 0179).	0180
Newbold Tunnel E. Portal	RUG Newbold, Rugby	140 SP487774	Canal:Tunnels	V	This tunnel was built in the 1830s when the route of the Oxford Canal was shortened by Charles Vignoles by 14 miles from that built by James Bridley. Earthworks were carried out by George Watson and then Charles Dutton and Thomas Hough laid the bricks in the new tunnel in 1833. The tunnel has two towpaths and is 204 yards long. The Resident Engineer was John Ferguson and the Company Engineer was Frederick Wood.	0178
Newbold Tunnel W. Portal	RUG Newbold, Rugby	140 SP485775	Canal:Tunnels	V	The west portal of Newbold Canal Tunnel. Built during the straightening of the Oxford Canal in the 1830s. The tunnel is 204 yards long and 24 ft. wide with a towpath on both sides. For further details see Newbold Canal Tunnel W. Portal (0178)	0179
Fenny Compton 'Tunnel'	STR On Oxford Canal 1 mile E of Fenny Compton	151 SP438523	Canal:Tunnels	A	The Oxford Canal originally passed through a shallow tunnel 1,138yd long. In 1838-40 it was partially opened out to leave two short tunnels. In 1866-69 the remaining tunnels were opened out. The Engineer for the later work was Richard Gillett and the contractor was William Death.	0048

Shrewley Canal Tunnel	WAR On Warwick & B'ham Canal, Shrewley	151 SP213673	Canal:Tunnels	A	A 443 yard long canal tunnel under the village of Shrewley completed in 1799. At the west end the towpath, rising from the side of the deep cutting, passes through a short tunnel of its own high above the canal. The towpath tunnel is 175ft long on a steeply rising gradient. A very rare, if not unique, feature.	0038
Coventry Canal Basin	COV Bishop Street, Coventry	140 SP333796	Canal:Wharves	A	A canal basin at the termination of the Coventry Canal in Coventry. A twin basin completed in 1769 with a mix of older features and modern redevelopment. The former includes weighbridge office, crane, coal storage vaults and canal-side wharves with canopies.	0001
Canal Boat Rudder	WAR Saltisford Canal Basin, Birmingham Rd. Warwick	151 SP273656	Canal:Wharves	O	The rudder from a Warwick & Napton Navigation Company narrow boat found during dredging at Saltisford as part of the restoration of the Saltisford Arm to navigation.	0385
Saltisford Canal Basin	WAR Birmingham Road, Warwick	151 SP273656	Canal:Wharves	O	Officially opened in 1799, the Warwick & Birmingham Canal terminated in the town of Warwick, serviced by the Saltisford Wharf. Derelict for many years, now restored by the Saltisford Canal Trust Ltd.	0384
Ashwin's Warehouse	STR Union Street, Stratford upon Avon	151 SP201550	Commercial:Retail	V	An extensive warehouse occupying much of the western side of Union Street and the corner of Guild Street. A fine 3-storey red, blue and yellow brick building, with stone facing, it seems to have been built in several stages with the changes in red brick colours in different sections of the building. Two broad entrances on Guild Street capable of receiving carts/vehicles. Ashwin's were general merchants, trading, for example in 1873, in 'Agricultural Implements, Corn, Seed & Oil Cake', and provided valuable commercial facilities to traders on Stratford's canal, river and roads. Now occupied by a number of different businesses.	0287

Sheldon's Wine Warehouse	STR New Street, Shipston on Stour	151 SP258404	Commercial:Retail	O	Edward Sheldon Wine Merchants have been trading in Shipston-on-Stour since 1842. Richard Badger, who started the business, passed the reins to his nephew, Edward Sheldon in the late 1850s. The firm experienced considerable expansion in the late 19th. century supplying wines to many parts of the Empire, and the business continues to this day. Interesting stone and brick building with 12,000 sq. ft. of original cellars (occasionally open for public tours) and engraved stone 'SHELDON WINE MERCHANTS' above the New Street entrance.	0286
Copeswood Grange, Coventry	COV Stoke, Coventry	140 SP365785	Comms.Telephone	V	A grand three storey red brick mansion with stone detailing and a prominent porch and entrance. Built in 1872 for the wealthy silk ribbon weaver James Hart, passing on to Sir Richard Moon of L.N.W.R. fame before eventually being bought by Peel Connor - later GEC - in 1921 as a club and hostel for its employees. It gained a reputation for the excellence of its facilities. Continued as a club through company changes GPT and Marconi until the demise of the company and the demolition of the site. Copsewood Grange remained but was subject to a series of arson attacks and is now in poor condition. Its future is uncertain with the development of the GEC site for housing.	0173
Pillar Box, Shirley	SOL Dog Kennel Lane, Shirley, Solihull	139 SP129771	Comms:Postal	A	A cast iron pillar box, mid 18th century. Fluted column on base, tapered towards the top. Band on top marked VR and POST OFFICE, with royal crests. Manufactured by Smith and Hawkes Ironfoundry, Broad Street, Birmingham	0158

The Maltings Brewery	WAR Lillington Avenue, Leamington Spa	151 SP316667	Drink:Brewing	V	Brewing on the Lillington Avenue site began in 1841 with significant buildings constructed in 1861 and further changes in 1896. The brewery passed through a number of hands, in 1885 becoming Lucas, Blackwell and Arkwright, later Lucas & Co. It was eventually sold to Ansell's and in its later years served as a store for the local authority. Two of the original buildings remain - the long malthouse and beer store and the brewmaster's house and office. The imposing malthouse is mainly red brick with attractive detailing in stone and blue brick, with two prominent sack hoists retained. The buildings are now converted to housing. Impressive gates and railings by renowned manufacturer Bayliss, Jones and Bayliss of Wolverhampton.	0129
Webster-Hemming Brickworks	COV Stoney Stanton Road, Coventry	140 SP342804	Extract:Brick	V	Clay was first dug in 1870 and brick production continued until the 1990s. Websters had ownership from 1896, with the Hemming name added in 1938. Firing took place in an 18-chamber Hoffman kiln (rebuilt in 1950). Visited whilst still in operation in 1993 by WIAS. Some of the site has been cleared but in 2014 two chimneys, kiln, some sheds and a reception office remain. Site is destined for conversion to housing.	0155
Baggeridge Brick	NOR Off Rush Lane, Tamworth (E. Of A51 road)	140 SP218992	Extract:Brick	V	The only brickworks in Warwickshire still in production . Since 2007 owned by Austrian Company Weinberger. Modern tunnel kilns with some older kilns converted to other uses. Large area of clay extraction to the south of the works, up to the M42.	0085

Clay Pool Whittleford Park	NUN Whittleford Park, Nuneaton	140 SP335919	Extract:Brick	A	The former clay pit of the Haunchwood Brick and Tile Company is the principal physical remains of the (large) Haunchwood Brick and Tile Company that occupied land between Stockingford and Camp Hill. The works closed in 1970, the buildings were demolished and the land became derelict, before a recent renovation project has created Whittleford Park, a green space for the community. The (flooded) clay pit now known as Clay Pool forms part of this Park. To aid interpretation of the space - and to remind the community of past history - the Park also contains an industrial heritage trail which has been created with a series of modern sculptures (often using Haunchwood products) concentrating on different aspects of the industry.	0235
Redland Tile Works	NUN Bayton Road, Bedworth	140 SP361859	Extract:Brick	V	In 1838 Staffordshire firm G.W.Lewis Tileries began producing 'Rosemary' (after Lewis's daughter) roof tiles from the local Etruria Marl clay. In 1920 G.W.Lewis joined with Haunchwood of Nuneaton. In 1984, Redland bought the Staffordshire company and decided to build a new production plant at Bedworth. Redland (part of worldwide Braas Monier Building Group) continues to produce the Rosemary tile.	0274

Fenny Compton Brick Kiln	STR A short distance to the east of the A423 bridge over the Oxford Canal near Fenny Compton. Access from the road or canal.	151 SP437524	Extract:Brick	V	This 19th century intermittent downdraught kiln is an unusual surviving example of a small local brickworks. The kiln - using spoil from the opened out Fenny Compton Tunnel on the adjacent Oxford Canal - produced bricks for use on the canal network and to supply local builders. It operated until at least 1917. Since closure it has been the subject of a survey by WIAS, and a recent restoration project by the Guild of Bricklayers - a considerable task in view of the pace at which vegetation returns to invade the site.	0145
Napton Quarry & Brickworks	STR Napton on the Hill	151 SP456613	Extract:Brick	V	A brickworks (Nelkson & Co.) was established in 1885 with a loading wharf to the Oxford Canal and a tramway serving the adjacent quarry. This became the Napton Brick and Tile Works in 1905. The brickworks closed in the 1970s and the last remaining buildings were demolished in 2016. The quarry contains much of geological interest and the brickworks area remains undeveloped. No public access but visible from a distance.	0329
Rugby Cement Works	RUG Lawford Road, Rugby	140 SP487756	Extract:Cement	V	As the UK's oldest cement works site still in operation, the Rugby Works are an important site in the history of the cement industry, both local and national. With origins in the 1850s, the quarries and works occupy an extensive site to the north of Lawford Road. Trading as Rugby Portland Cement 1871-1979 and the Rugby Group 1979-2000, upgrading of the plant (with associated closure of the Southam works) was undertaken from 2000 under RMC (Ready Mixed Concrete) ownership, with Cemex (Cementos Mexicanos) taking over in 2005. The modern works are a dominant feature of the local landscape, with some elements of former operations occasionally visible.	0288

Q. Elizabeth Rd. Nuneaton	NUN Camp Hill, Nuneaton	140 SP336923	Extract:coal	V	Camp Hill, Nuneaton was chosen by the National Coal Board in the 1950s as the site for housing specifically for workers in the local mining industry. Many of these workers were attracted from the north-east (and elsewhere) to the (then) bouyant job opportunities in the N. Warwickshire coal industry. It also received displaced workers from overseas e.g. Hugarians fleeing the 1956 uprising. The main NCB housing was between Queen Elizabeth and Edinburgh streets whilst council housing occupied the streets higher up the hill. The NCB estate was seen as a pioneering post-war scheme, cheap and easy to construct with rough-cast finish. With the decline of coal mining in Warwickshire the Camp Hill estate suffered considerably and the rather drab nature of much of the housing did little to help. A major renovation programme is currently in operation. Many of these ex-NCB houses are due for demolition but those on Queen Elizabeth road will remain. They overlook Whittleford Park, a green space which was once the location of coal mining and then Haunchwood brick and tile manufacture.	0232
Burton Dassett Qry & Beacon	STR Burton Dassett	151 SP395522	Extract:Iron Ore	A	The Burton Dassett Hills are of Jurassic Ironstone and were quarried for stone and iron ore. The quarries have existed since early times but were most actiive during the periods 1898-1909 and 1918-1925 after which they were abandoned. Ore was moved by horse walkways around the site and by an aerial endless wire ropeway. This was 1.5 miles long, ran down to the Burton Dassett sidings on the S.M.J., railway and could tranport 200 tons per 10 hour day. A stone beacon is also on the site, circa 1500. The site is now a Warwickshire Country Park.	0199

Bishop's Bowl Lakes	STR Bishops Itchington	151 SP386588	Extract:Lime	P	The 90 acre site of the former Greaves, Bull and Lakin limestone quarries that fed the nearby cement works. The quarries have been abandoned and allowed to flood and these are now used by Bishops Bowl Fishery. Most of the pools lie to the west of the B4451, and the site can be accessed by fishermen!	0281
The Eighteens, Wilmcote	STR Aston Cantlow Road, Wilmcote	151 SP158583	Extract:Lime	V	Three sets of six stone-built quarrymen's cottages (making 'The Eighteens') to house workers for the Wilmcote limestone quarries. Their appearance has been altered by the addition of various styles of porch at the front and extensions to the rear. The quarries themselves closed at the beginning of the twentieth century and few traces remain. The local pub - the Masons Arms - serves as a reminder of this activity.	0240
The Tens, Wilmcote	STR off Aston Cantlow Road, Wilmcote	151 SP162580	Extract:Lime	V	Row of ten stone-built quarrymen's cottages to house workers for the Wilmcote limestone quarries. Their appearance has been altered by the addition of various styles of porch at front and rear. Separate coal house and toilet at rear. A current resident suggested that 'The Tens' were foremen's cottages, whilst 'The Eighteens' (see database entry) were workers' cottages. The quarries themselves closed at the beginning of the twentieth century and few traces remain. The name of the local pub - the Masons Arms - serves as a reminder of this activity	0239
Newbold Quarry Park	RUG Newbold on Avon	140 SP495770	Extract:Limestone	A	A flooded limestone quarry which provided raw materials for the local cement industry until the 1920s. Later used as a top-up reservoir for the Oxford Canal. Now a nature reserve - Newbold Quarry Park.	0138
Parkfield Road Quarry Rugby	RUG Parkfield Road, Rugby	140 SP493759	Extract:Limestone	V	An abandoned quarry of the Rugby Cement (now Cemex) works. Currently (2014) being converted into a nature reserve.	0139

Kingsbury Water Park	NOR Kingsbury	139 SP206960	Extract:sandgravel	O	Part of the sand and gravel landscape of the Tame valley. An area covering 625 acres with 15 lakes, which was previously used for sand and gravel extraction. Workings began in the 1930s and lasted until the 1980s. The first gravel company involved was Midland Gravel who were later bought out by Blue Circle Aggregates which later became Amey Roadstone Corporation and eventually Hanson Aggregates drew the extraction to an end in 1981. The Water Park - providing a wide range of recreational options - was first opened in 1975 and has become a very popular site for visitors.	0227
Lea Marston Lakes	NOR Coton Road, Lea Marston	139 SP213942	Extract:sandgravel	V	Part of the sand and gravel landscape of the Tame valley. Originally flooded gravel pits, in the 1960s they were incorporated in a scheme to improve the (highly polluted) River Tame. The river was re-directed into the lakes as a means of cleaning the water, with regular dredging and disposal of the resulting waste. The scheme was very successful and water purity was much improved. This, together with developments elsewhere on the system, has meant that this purification role is no longer required and consideration is being given to the future use of the lakes.	0229
Brandon Marsh Nature Reserve	RUG Brandon Lane, Brandon	140 SP385754	Extract:sandgravel	O	Part of the sand and gravel landscape of the Avon valley. The first pools were created by mining subsidence in the 1940s and 1950s from nearby Binley Colliery. The area then became a site for gravel extraction and a large area of flooded pits, fen and scrub now remain. It has become a Nature Reserve and an important site for bird watchers. Hope Construction Materials currently (2015) maintain a ready-mixed concrete plant on a site adjacent to the approach road to the Reserve.	0228

Jee's Hartshill Quarry	NOR SW of B4111 Nuneaton-Atherstone road	140 SP333940	Extract:Stone	V	Originally started by Richard Gee in 1822, these workings became a very extensive roadstone quarry, occupying a large area between the B4111 and Hartshill to the west. Quarry working ended by 2000, the buildings abandoned and the quarry is flooded. Only viewable through security fencing.	0105
Mancetter Quarries	NOR Mancetter	140 SP307955	Extract:Stone	V	Mancetter Quarries refers to three quarries - Purley Quarry, Jubilee Quarry and Oldbury Quarry. The stone quarried is Diorite (an igneous rock of the granite family). It may have been quarried over a long period but there is certainly evidence of quarrying activity from 1873. Originally in private hands, the quarries have passed through a number of different corporate owners, with Larfarge Tarmac the present operators of the site. Current activities are visible from public footpaths. The quarries have been the subject of research by the Warwickshire Geological Conservation Group.	0087
Griff No. 4 Granite Quarry	NUN Gipsy Lane, Nuneaton	140 SP363887	Extract:Stone	P	One of several granite quarries that once existed in the area, Griff No. 4 Granite Quarry has been in existence for over 90 years and now covers an area of over 60 acres. It has been operated by a number of different companies over the years (most recently Midland Quarry Products), supplying granite products to the Midlands aggregates market. Quarrying has now ceased and a long term plan of infilling has been enacted, with the eventual goal of returning the site to agriculture, nature conservation and the preservation of the on-site geological SSSI. Midland Quarry Products currently (2015) continue to operate an on-site asphalt plant.	0234

Judkins Quarry Tuttle Hill	NUN NE of B4111, Tuttle Hill, Nuneaton	140 SP343932	Extract:Stone	V	A very large, disused, roadstone quarry. Quarrying began in the early 19th century with the Judkins family certainly involved from mid-century. The Judkins company through land purchase and absorption of other quarries created a large operation which in the 1970s was taken over by Amey Roadstone Corporation (ARC). Quarrying has now ceased and after a period as a landfill site, part of the quarry has become the Judkins Waste Recycling Centre. Partial views through security fencing.	0110
Midland Quarry	NUN South side of Nuneaton-Atherstone road B4114 (Tuttle Hill)	140 SP349925	Extract:Stone	V	A disused and flooded diorite and quartzite quarry previously supplying roadstone and railway ballast. Recent regeneration as a feature of Camp Hill Development. Excellent views of the quarry from Corrib Road (off Tuttle Hill).	0101
Mount Jud, Tuttle Hill	NUN Tuttle Hill, Nuneaton	140 SP349929	Extract:Stone	V	The waste tip of the extensive Judkins Quarry. A local landmark known as 'Mount Jud'.	0111
Grendon Hall Ice House	NOR Farm Lane, Grendon	140 SP288010	Food:Ice	V	The Ice House at Grendon Hall (demolished 1933) is made from red brick with a domed ceiling. The building is buried under a covering of earth and thick ivy. There is a low and narrow arched entrance which is approximately 3.5 metres (11.5 ft) long and 1.5 metres (5 ft) high. The main body of the structure is approximately 3 - 4 metres (10 - 13 ft) in diameter and about 5 metres (16.5 ft) high. The fabric is in remarkably good condition and dry although a considerable amount of rubbish has been dumped inside.	0361
Compton Verney Ice House	STR Compton Verney	151 SP313528	Food:Ice	O	The restored ice-house at Compton Verney dates from 1771 with an unusual thatched roof covering the brick built structure. Entry to Compton Verney is required in order to view.	0327

Farnborough Hall Ice House	STR Farnborough Hall, Farnborough	151 SP429494	Food:Ice	O	An eighteenth century ice-house, brick lined with ironstone surround and curved retaining walls. Currently (2016) undergoing restoration after the collapse of a nearby yew tree damaged the structure.	0326
Ice House, Stonleigh Abbey	WAR Stonefeigh Abbey Grounds	151 SP315709	Food:Ice	O	Remains of an Ice House on the west bank of the River Avon in the grounds of Stoneleigh Abbey estate. Approach with extreme care! Location is heavily over grown and on a steep bank.	0301
Warwick Castle Ice House	WAR Warwick Castle, Warwick	151 SP284648	Food:Ice	O	A double vaulted ice-house dating from 1830, located in the rose garden at Warwick Castle. Entry to Warwick Castle is required in order to view.	0328
Model Village, Long Itchington	STR Off Southam Road, Long Itchington	151 SP415641	Housing:Cement	V	A 'model village' provided by Kaye's Cement for its workers which still retains a certain atmosphere with a broad, tree-lined main road with houses either side. Started in 1912, it was built in several stages (reflected in the different house-styles), although the plans for a shop and village hall never materialised. The early concrete-built houses used the Calway System. In 1934, Kaye's was taken over by Rugby Cement, and the houses were sold off into private hands from the 1980s onwards. In several instances new types of windows and the addition of porches have altered the uniformity of the housing but the fundamental lay-out remains the same.	0279

Victoria Terrace Housing	STR Victoria Terrace, Stockton	151 SP437639	Housing:Cement	V	Stockton is a village that developed as a result of the growth of the nearby Nelson's cement works. The company was instrumental in providing housing for its workers, and there are many examples in the village - e.g. Victoria Terrace, Napton Road, George Street, Elm Row (where the manager's house was also located). The houses are distinctive in their use of red and yellow brick, and Victoria Terrace has some interesting cement pillars supporting the front porches. Nelsons also funded the provision of Stockton Methodist Church and The Nelson Working Men's Club, such that it lays claim to be one of Warwickshire's best examples of a 'company village'.	0275
Alpha House, Coventry	COV Stoke Heath, W. of Coventry City centre	140 SP352798	Housing:Domestic	V	The first multi storey building in the world to be built by the 'Jack Block' system. Construction began with the roof which was then jacked up and the next storey added below. This process was continued until all 17 storeys had been added. Completed in 1963. Contractor Richard Costain for Coventry City Council.	0053
Miners' Housing, Piccadilly	NOR Piccadilly, Kingsbury	139 SP229980	Housing:Mining	V	Two terraces built in 1906 specifically to house the miners working at the nearby (newly opened) Kingsbury Colliery.	0121
Railway Cottages, Flecknoe	STR Flecknoe Station Road, Flecknoe	151 SP496645	Housing:Rail	V	A terraced row of cottages built for staff at Flecknoe station on the L.N.W.R. line from Leamington to Weedon.	0334
Station Cottages, L. Itchington	STR Southam Road, Long Itchington	151 SP417641	Housing:Rail	V	A terraced row of cottages provided by the L.N.W.R. for staff working at Southam and Long Itchington station on the Leamington to Weedon line.	0336
Station Cottages, Stockton	STR Station Road, Stockton	151 SP447645	Housing:Rail	V	A terraced row of cottages provided for staff at the Napton and Stockton station on the L.N.W.R. line from Leamington to Weedon.	0335

Sarginsons Factory	COV Torrington Avenue, Coventry	140 SP295778	Mfg:Metals	V	An important survivor of manufacturing in the city, Sarginsons have been specialising in aluminium diecasting in Coventry since the 1930s. They have kept pace with developments in foundry technology via investment on the (functional, brick built) Torrington Avenue site. Sarginsons are now one of the few European companies that can offer low pressure diecasting, sandcasting and gravity diecasting in a single foundry. Cleints include some of the most respected names in the automotive, petrochemical, energy and engineering sectors including Rotork, Jaguar Land Rover, Caterpillar, Bosch, JCB, Aston Martin, Tata and Siemens.	0341
Nuneaton Engineering Co.	NUN Tuttle Hill, Nuneaton	140 SP352925	Mfg:Metals	V	Nuneaton Engineering Co. (former) Foundry. Constructed in 1898 to enable a larger foundry capacity for the Nuneaton Engineering Co. (formerly Hall West & Co.), owned by Reginald Stanley (of brick making fame). It made many different types of casting for the industries of Nuneaton (especially coal mining and brick making) as well as carrying out general engineering work and repairs. The foundry is long closed with the site now known as Ratcliffe Buildings and, whilst some of the original brickwork on the frontage has survived, the site is generally in a poor state of repair.	0310
Alstom Power Willans Works	RUG Newbold Road, Rugby CV21 2NH	140 SP498759	Mfg:Metals	V	Works opened by Willans and Robinson in 1897 for the manufacture of Willans Central Valve engines.	0195
National Motorcycle Museum	SOL Coventry Road, Solihull	139 SP200828	Motor Cycles	O	Developed by millionaire Roy Richards the Museum houses the world's largest collection of British motorcycles. Some local producers are featured. Suffered a disastrous fire in 2003 when 380 motor cycles were lost, including some of the rarest exhibits	0260

British Leyland Capmartin Rd.	COV Capmartin Road, Radford, Coventry CV6 3LT	140 SP334810	Motor vehicles	V	Work on the Capmartin Road Shadow Factory, designated Daimler No. 1 started in 1937. The plant was located adjacent to the main Daimler plant by the Coventry to Nuneaton railway line. The standard design was adopted, containing a manufacturing hall along with boiler and compressor houses, an office block and messing facilities. All the above were the original build. Wartime production focussed on aero engine components employing c. 2,500 employees. Postwar the plant continued with production of Daimler Scout cars until 1957. The Standard Motor Company took a 30 year lease in 1958 and the site was fenced off. Production centered on the manufacture/assembly of axles and transmissions for BL cars. In 1987 Jaguar purchased the site from BL. Redevelopment started in 1987 with demolition/disposal of surplus buildings. The first building disposed of was a wartime Robin Hanger which was donated to the Midland Air Museum. The manufacturing hall Paint Shop was demolished. Bays 1 - 14 were stripped of services and cladding. Bays 15 upwards were demolished. Isolated bases for KTM CNC machine tools were built and then new steelwork for bays 13 - 30. The buiding was reclad and serviced. The Capmartin site was sold to Kings Automotive Systems before the main Daimler site was redeveloped for housing. The Capmartin Road building bays 1 to 14 is the largest part of the former Daimler site remaining.	0192

Calcutt Brothers Offices	COV Far Gosford Street, Coventry	140 SP344788	Motor vehicles	V	One of the few remaining city centre locations of Coventry's motor industry. Calcott Brothers started as cycle manufacturers in the late 19th century, turned to motor cycles in 1905 and motor vehicles in 1913. Office buildings constructed in 1896. Three storey brick with hipped slate roof and prominent Dutch gables as well as yellow terracotta (including 1896 date). Trace of 'CALCOTT BROS' sign remains. High quality internal decoration including mosaic floors, etched glass screens and oak staircases. Manufacturing occurred in sheds behind the building. Taken over by Singer in 1927, closed soon afterwards. Site sold to Astleys in 1939. Recently became part of Coventry University.	0108
Canley Cars Entrance Gates	COV Canley Road, Coventry	140 SP308773	Motor Vehicles	A	Entrance gates to the former home of 'Canley Cars'. The company moved to various locations around Coventry and were in business from 1945, moving new Triumph cars from the nearby factory to Triumph dealers in the UK. They occupied this site, behind C & E Motors, in the 9150s and operated until sold to new owners in the 1960s. The site is now occupied mainly by a Homebase store.	0367

Castle Works, Coventry	COV Aldbourne Road. Bishopsgate Green, Coventry	140 SP334802	Motor vehicles	V	The Riley Engine Company was formed in 1903 by Percy Riley to supply engines to the Riley Cycle Co. and Singer. In 1906 it moved to Castle Works. An existing factory building with riveted steel frame with brick panel infill and a north light roof. Additions have been made but the original building detail is still visible. In 1931 Riley Engines was taken over by the Riley Company. The Riley Engine Co. was taken independent in 1938 by Percy Riley. In 1941 following Percy's death the company, now renamed PR Motors, started design and manufacture of gearboxes and transmissions for construction dumpers expanding later to marine and other specialist applications. In 1964 a No. 2 factory was acquired in Earlsdon. In 1966 the company was taken over by Newage Engineers. Since then there have been a number of owners and names. Most recent, in 2014, is PRM Marine. The Castle Works is still operational but the main works is now Barlow Road, Aldermans Green.	0190
Challenge Cycle Co. Offices	COV 216 Foleshill Road, Coventry	140 SP337803	Motor vehicles	V	The Challenge Cycle Company moved to premises on the Foleshill Road in 1906 where they went on to make motor cycles and cars. The factory consisted of rather grandiose offices fronting the Foleshill Road and extensive workshops behind. The offices remain today, red brick and stone, with large gables at either end of a central entrance. Subsequently passed through a range of other uses.	0116

Cunard Works/Riley	COV Durbar Avenue, Foleshill, Coventry	140 SP340823	Motor vehicles	V	In 1916 Stanley Riley established the Nero Engine Company in the Cunard Works to build a 4cyl 10hp car. After making a contribution to the WW1 war effort, the company was absorbed into Riley (Coventry) Ltd. in 1918. By 1919 Riley had disposed of their Nicholas Street works and moved to Durbar Avenue. A May 1929 aerial photograph shows an expanding site covering a number of phases. The buildings are mainly northlight construction though two large sheds are in build progress. Compared to a c. 2012 aerial photograph it can be seen that most of the 1929 buildings have survived. An external site inspection confirms the position with the building framework showing through later cladding. Many high end models were produced in the 1920s and 30s but the company over extended itself leading to a takeover by Nuffield in 1938 and assignment to Morris Motors. Following WW2 war production, car building re-started in 1945. However production of Riley cars was moved to MG in Abingdon in 1948. Morris Motors took over in 1948 (as Engine Division) and continued for a number of years. This was followed by Unipart spares and Unipart Eberspacher Exhaust Systems (2014).	0191

Jaguar Cars Browns Lane	COV Browns Lane, Allesley, Coventry CV5 9DR	140 SP301817	Motor vehicles	V	Browns Lane was built as WW2 Shadow Factory in 1939 managed by the Daimler Motor Co. and designated Daimler No. 2 Shadow Factory. The plant comprised a 51 bay 1530 ft x 240 ft manufacturing hall and supporting service buildings for production of aircraft sub-assemblies - which may have included complete engines. Jaguar Cars acquired the site in 1951, moving from Swallow Road by November 1952. (see 0193 - Jaguar Cars Swallow Road). Extensive building took place post 1952, part of which was designated 'No.2' factory, at various times this included: vehicle finish lines; Service workshops; Seat build; No. 2 paint shop and Veneer manufacturing - VMC. Jaguar vehicles built at Browns Lane 1952 - 2005 included: XK, XJ, E Type, Mark VII-X, XJS with Daimler and Van Den Plas badged variants and limousines. Trim and final assembly operations were transferred to the Jaguar Castle Bromwich site by 2005 because of production over capacity. A large part of the site comprising the majority of the original shadow factory was then sold off in 2008 for demolition and redevelopment. All that remains of the original shadow factory is the 36 MW 'Lamont' site central boiler house. In 2010 the VMC was sold to Lawrence Automotive Interiors and the site was split again. Jaguar, now named Janguar Land Rover, operate the remainder. 2014 operations are: vehicle pilot build; Education in the Community; support operations. Vehicle manufacturing returned in 2014 to build 6 No. 'Lightweight E Types' in a new 'Customer Heritage Vehicle' facility to complete the original 1962 plan for 18 No. vehicles. A prototype was completed in August 2014.	0194

Jaguar Cars Swallow Road	COV Swallow Road, Whitmore Parkl, Coventry	140 SP329823	Motor vehicles	V	Jaguar Cars original name was Swallow Sidecars. They started business in Blackpool in 1922 manufacturing motorcycle sidecars. They eventually expanded into car body coach building in 1927 making the Swallow body for Austin 7's. The company ran out of manufacturing space in 1927 and moved to Coventry in 1928. The first site was in Whitmore Park, Holbrooks. They occupied the two NW blocks of a 16 block former White and Poppe WW1 shell filling factory. By 1932 they had occupied half of the original site. An office block was added along with other smaller buildings. Two or more of the original shell filling buildings are thought to be still in existence. Further land was purchased in 1937 and 1938 to cater for the new pressed steel SS car body. Motor Panels was purchased for the same purpose in 1938 - sold to Rubery Owen in 1941. Production developed in the 1930s to SS car bodies and full vehicles in 1935. In 1939-40 an 8 acre Air Ministry funded factory for the manufacture and repair of military aero components was built to the west. In 1945 car production moved into the new plant. The site still exists. In 1945 the company changed its name from SS cars to Jaguar Cars because of obvious wartime links. By 1950 the site was very cramped. Jaguar negotiated purchase of the former Daimler No. 2 Shadow Factory at Browns Lane in 1951. Full production was transferred to Browns Lane by November 1952 and the old site was sold for £443,000.	0193

London Taxi Company	COV Holyhead Road, Coventry CV5 8JJ	140 SP323795	Motor Vehicles	V	In 1928 Carbodies, a coach builder, moved from West Orchards in the centre of Coventry to the Holyhead Road site to increase production capacity. A 1934 aerial photograph shows a fairly well developed site. The company built car bodies for a range of manufacturers including Alvis, Austin, MG, Rover and Rootes Group before WW2. During the war they switched to military vehicle bodies and pressed aircraft components. Post war body shell customers included: Austin, Daimler, Ford, Hillman and the Austin FX taxi plant. In 1958 final assembly, finishing and delivery was started for the FX taxi. The full production of the taxi was completed with the move of the FX4 chassis line from BL Adderley Park in 1971, Carbodies taking full responsibility for design and production from 1984. Taxi production is now the prime manufacturing focus and continues to date. Over time Carbodies has also produced prototype car bodies and motor cycle panels. Carbodies changed ownership a number of times, moving to BSA, Manganese Bronze Holdings, London Taxi Intenational and fianlly the London Taxi Company in 2010. The company hjas now entered a partnership with Geely, a Chinese auto manufacturer, to build a plant for London Taxi production in China fopr export purposes.	0183
Massey Ferguson Memorial	COV Banner Lane, Coventry	140 SP274794	Motor Vehicles	A	The Massey Ferguson Memorial. At the former entrance to the site of the western world's largest tractor manufacturing plant. The plant produced 3,307,996 units for home use and export between 1946 and 2003. Nothing remains of the site today except some perimeter fencing. Close by in Broad Lane the MF Social Club still thrives. An early brick farm house building and pig sty are incorporated into the club which contains a wonderful collection of photographs, some taken indside the old plant.	0360

Quinton Works, Coventry	COV Corner of Mile Lane and Parkside, Coventry	140 SP336785	Motor vehicles	V	Built in 1890 as the office block of S.& B. Gorton's Cycle Works, then occupied by Quinton Cycle Co. from 1891, and the New Beeston Cycle Company from 1896. An important site for the development of Coventry's motor industry for early experiments by the Beeston Company produced a motorised tricycle in 1896. The Beeston Car Company used the site until 1900, then becoming Rademaker's Chocolate factory until 1905 before being occupied by the Swift Motor Co. until 1931. The buildings were restored in 1999 and part was adapted to become a hotel.	0117
Renold & Cov'try Chain Works	COV Arches Industrial Estate, Spon End, Coventry	140 SP322791	Motor Vehicles	V	Formed as a cycle chain business in Dale Street in 1896 by Alexander Hill (of the Hill watchmaking family) the Coventry Chain Co. moved to new premises in Spon End in 1907. The firm grew considerably and in 1930 decided to merge with (former rival) Hans Renold Ltd. to form Renold and Coventry Chain Company. Eventually the Renold company ended production in Coventry and the buildings now make up part of the Arches Industrial Estate. The distinctive office block and various production units remain, now occupied by a mix of industrial and commercial enterprises. Interesting war memorial in front of the office block with the inscription 'Erected by the Employees of The Coventry Chain Co. in Memory of their 45 comrades who fell in the Great War 1914-1918'.	0174

Singer Office Block Coventry	COV Canterbury Street, Coventry	140 SP342794	Motor vehicles	V	The Singer Company was formed in 1874 by cycle manufacturer George Singer and the office block of the Canterbury Street works was built in 1891 to front a large works behind. Chateau-syle building designed by Harry Quick, now white rendered. Singer moved from cycle to motor cycle (to 1915) and car manufacture (from 1905). The building, known as Singer Hall, is now accommodation for Coventry University students.	0128
Townsend/Humber Works	COV Far Gosford Street, Coventry	140 SP346791	Motor vehicles	V	Built as a factory for Townsend Brothers in 1891 with impressive office frontage to Far Gosford Street and extensive workshops to the rear. Bought by Coronet Motor Co. (motor cycles, later cars) in 1903 and by Humber in 1906 although a fire soon persuaded them to move location. Front of the building converted into shops although some of the buildings were utilized by Payne's Lane Motor Engine Works. More recently the building has been reduced in size to accommodate road improvements and is currently occupied by Lloyds Bank. Three storey white rendered building with prominent central gabled porch, partially obscured by later developments.	0112

William Morris Building	COV Gosford Street, Coventry	140 SP341788	Motor vehicles	V	In the First World War Hotchkiss (a French arms manufacturer) transferred its production to England and chose this site (formerly Arno Motor Works). After the war Hotchkiss gained a contract to produce Morris engines but in 1923 Morris acquired Hotchkiss, renamed it Morris Engines Ltd. and embarked on an expansion programme. The western part of the current building is the original factory whilst the lower part was built by Morris as his engine plant. Morris soon had to move further out to Courthouse Green to meet production needs. The Gosford Street factory went through various changes of function with Coventry University adapting it to its current use with the addition of two top floors above the original red brick and stone building.	0109
Bluemels Office Block	RUG Bluemels Drive, Wolston	140 SP411758	Motor vehicles	V	Originally built for Cash's of Coventry in 1899 as a location for their (unsuccessful) experimentation with artificial silk. The London based Bluemel Brothers purchased the site in 1902 to supply Coventry's rapidly growing cycle and motor industry with a range of accessories such as cycle pumps and mudguards for cycles and spark plugs and accumulators for cars. After the closure of the factory in 1985 the workshops became a Business Park before being demolished in 2004. The Office Block was saved, now converted to housing. Two storey red brick with additional stone and browner brick detailing. Impressive wood panelling and staircase inside. Over the front entrance is the familiar Bluemel 'no weight' trademark, a 'B' with feather entwined.	0132

Wilsdon Coachworks	SOL Lode Lane, Solihull	139 SP153810	Motor vehicles	V	The former premises (the 'Herculite Works') of Wilsdon and Co. Coachworks, a firm specialising in bodywork and coachwork for a range of vehicles. Established in 1892 in central Solihull, the firm moved to the new Lode Lane industrial estate in the 1960s. Extensive workshops lie behind and to the right of the frontage. Taken over in 1995, production was moved elsewhere and the buildings became the home for a Christian Renewal Centre.	0206
Motor Heritage Ctr., Gaydon	STR Gaydon, Warwickshire	151 SP356546	Motor Vehicles	O	A collection of nearly 300 cars, covering a number of UK producers from the smaller manufacturers such as Morgan, via niche producers such as Land Rover, to the mainstream producers such as Austin and Morris. The Museum Trust also works closely with the heritage arms of Britain's major car concerns, including Ford, Jaguar and Vauxhall. The Museum has a considerable archive collection as well, covering documents, photographs, and films.	0269
Automotive Products Factory	WAR Office and Factory 32 Clemens Street Leamington Spa	151 SP320651	Motor Vehicles	V	Automotive Products of London bought the Zephyr Carburetor Co. in Clemens Street in 1929 and started making Lockheed Brakes and later Borg and Beck Clutches. They expanded to a new factory in Tachbrook Road in 1931. The Clemens Street site was used for their Test Equipment manufacture well into the 1970s.	0170
Healey Motor Works	WAR Lock Lane, Warwick	151 SP259660	Motor Vehicles	V	Remaining buildings of the motor works established in 1945 by Donald Healey. Early Healeys and Austin Healeys manufactured here. Since 2008 the site has been occupied by JME Healeys (John Everard), a firm dedicated to the restoration of Healey cars.	0203

Priory Needleworks, Alcester	STR 81, Priory Road, Alcester	150 SP087575	Needlemaking	V	Priory needleworks at the rear of The Priory - the frontage to Priory Road gives no indication of what lies behind. Two storey red brick building at right angles to the main house. Row of 11 arched cast iron window frames on top storey. Nineteenth century needleworks later converted to bicycle manufacture. Strictly no access - partial view of rear of building from School Road.	0168
Ragley Needle Mill, Alcester	STR Ragley Mill Lane, Alcester	150 SP086580	Needlemaking	V	Long history of a watermill on the site which was given over to needlemaking in the 18th and 19th centuries. Ceased working as a mill in the 1920s, with buildings subsequently utilised for agricultural and residential purposes. An intricate 2 and 3 storey red brick set of buildings arranged in a right angle. Major renovation in the 1980s to create a number of dwellings. Some machinery remains in one of the (private) houses. Only a general view of the buildings is available from Ragley Mill Lane.	0169
Daimler Power House	COV Sandy Lane, Coventry	140 SP333800	Power:Electric	V	The Power House, Sandy Lane, one of the few remaining buildings of the Daimler Works, first established by Harry Lawson in 1896 in a converted cotton mill. ('Motor Mills')	0134
Electric Wharf, Sandy Lane	COV Off Sandy Lane, Coventry	140 SP333801	Power:Electric	V	Canalside location of Coventry's power station and depot. Operated from 1896 until 1936. It has been imaginatively converted to accommodate business premises and homes, retaining bold elements of the original structure.	0133
Electricity Station, Coventry	COV Abercorn Road, Chapelfields, Coventry	140 SP314787	Power:Electric	V	A red brick electricity station supplying power to the western side of the City. Constructed in the early 20th century and proudly displaying the name of the city on the front.	0378

Warwick Gas Works	WAR Birmingham Road, Warwick	151 SP275656	Power:Gas	V	The site of one of the earliest gas works in the world. The original buildings, erected in 1822 included the two existing octagonal towers which contained the gas holders. In 1905 an office block was erected between the towers. Other buldings to the rear have been demolished.	0006
Hawkesbury Engine House	NUN Hawkesbury Canal Junction of Coventry and Oxford Canals	140 SP362846	Power:Steam	V	An engine and pump house used to raise water into the Coventry Canal. First used in 1821 with 'Lady Godiva', a Newcomen beam engine. Later suuplemented by a more powerful engine. 'Lady Godiva' was moved to Dartmouth (birthplace of Thomas Newcomen) in 1963 where it is on display. Solid three storey blue brick building with chimney.	0136
Mancetter Mill	NOR Mill Lane, Mancetter	140 SP322966	Power:Water	V	A small water mill on the River Anker, much reduced in height and showing scant evidence of mill activity. Mill Lane crosses the mill race on a footbridge with the (undershot) wheel pit discernible from the bridge.	0340
Packington Mill	NOR Packington Park Estate, Great Packington	140 SP216837	Power:Water	P	The ruins of Packington Mill are sited deep in woodland. Some of the fabric dates from The 17th century. The overshot wheel was originally fed by a long leat from the Great Pool. After the Hall Pool was constructed a much shorter leat was made from this pool. The mill was disused by 1905 and largely dismantled during WWII. Remains of the waterwheel, millstones and some gearing are in the derelict (sandstone and brick) building.	0346
Little Lawford Watermill	RUG Claymill Lane, Little Lawford	140 SP469771	Power:Water	V	Evidence of a mill on this site for a long period prior to the construction of the current buildings in the 19th century. Three storey red brick mill, integrated with the milll house. Milling continued to the 1920s but the water wheel removed in the 1940s. Recent renovation for enhanced residential accommodation.	0131

Arrow Watermill	STR Arrow, Near Alcester	150 SP082560	Power:Water	V	A long-established mill site, the current building dates from the early 19th century. The Sisam family ran the mill for many years after 1825, before Adkins & Thomas Ltd. assumed responsibility 1921-1962. The mill was then converted into a restaurant and hotel facility with considerable changes to the buildings.	0313
Burmington Mill	STR Burmington	151 SP261381	Power:Water	V	This large 4-storey mill was built in two phases - the southern section in the 18th century, the northern in the 19th. Powered by two waterwheels, later replaced by turbines. These are now all removed. Milling ceased in the 1950s and the building was used by a firm manufacturing prefabricated buildings before being partly converted into flats, then becoming a Christian Retreat. A serious flood - and subsequent fire in 2007 when a faulty humidifier sparked the blaze - has resulted in a major refit internally and the removal of the external lucam from the eastern end of the mill. An (unrestored) forge exists on the western end and there is a separate mill house building marked 'J C E of N 1752'.	0357
Charlecote Water Mill	STR On Hampton Lucy to Charlecote lane near R. Avon bridge	151 SP258572	Power:Water	O	A red brick three storey mill probably built in the 18th century on the site of earlier mills. Two undershot water wheels. West wheel drives two pairs of stones, east wheel drives the ancillary machinery. Restored to use.	0049

Clifford Chambers (Forge) Mill	STR Clifford Chambers (River Stour)	151 SP197527	Power:Water	V	One of two mills in Clifford Chambers on the river Stour, the mill is known as Clifford Mill or Clifford Forge Mill, for it had been used as an iron forge in the 18th century. It was rebuilt in 1853 and used for flour milling. In 1946 Tibor Reich - the renowned textile designer - set up business within the mill buildings. He designed and produced fabrics that were innovative in their textured surfaces and abstract patterns. A weaving unit flourished for many years, with a maximum workforce of 80 and Reich received many high profile commissions. The mill was closed in 1978, a decision much influenced by the constant risk of flooding. Much conversion and extension has taken place since then and the buildings are now converted into dwellings and small business units, with an impressive chimney remaining. The mill manager's house - Clifford Forge House (listed) - is nearby.	0217
Clifford Chambers (Old) Mill	STR Clifford Chambers (River Stour)	151 SP199520	Power:Water	V	One of two mills in Clifford Chambers located on the River Stour. A mill had long existed on the site but the current brick building dates from the 18th century. It was a water mill until 1926 when an electricity generating turbine was installed. Adapted for various uses over time, including a laundry for Clifford Chambers Manor, it is now a private house. A public footpath runs directly in front of the mill and evidence of the building's former life as a mill can be seen.	0216

Great Alne Mills	STR Mill Lane, Great Alne	150 SP122589	Power:Water	V	A collection of buildings clustered round a red brick four storey water powered corn mill of (mainly) 19th century buildings which have been much altered over time. These changes have been conditioned by the need to expand production, the introduction of new technology (turbine and diesel engine) and the accommodation of grain handling facilities. The complex includes the mill manager's house. Latest incarnation as a series of luxury apartments and houses.	0141
Hoo Mill, Haselor	STR Haselor, Alcester	150 SP106578	Power:Water	V	An interesting mill complex that contains a former corn mill and a needle-pointing mill, together with a mill house. The mill buildings largely date from 1810 with the needle mill added in the mid 19th century. The mills were powered by a low breast-shot waterwheel. Now a private residence it can be (partially) viewed from a footpath that runs alongside the River Alne.	0225
Shipston Mill	STR Mill Street, Shipston on Stour	151 SP260404	Power:Water	V	Three storey (painted) brick mill on the River Stour. Undershot water wheel and machinery removed when the mill closed. Converted into an hotel.	0157
Wellesbourne Water Mill	STR Wellesbourne	151 SP287537	Power:Water	P	A water mill powered by the River Dene with a breast shot water wheel 17ft diameter powering two sets of stones. Dated 1834 on the building. Water retained by a dam with spillway. Last worked by water power before 1939 but continued with external power. Dam repaired in 1988, mill restored to use in 1989.	0028

Wootton Wawen Mill	STR Stratford Road, Wootton Wawen	151 SP156631	Power:Water	V	There is evidence of mills on the river Alne at Wootton Wawen over a long period, and in the 18th. century the mill was converted to paper making. It had become a corn mill by the mid-19th, and this lasted until 1912. The waterwheels were replaced by water turbines and electricity was supplied to nearby Wootton Hall. The impressive brick-built 5-storey mill complex fronting the Stratford Road dates from the 18th. century has been used for number of purposes since milling stopped, (including storage for Atco lawnmowers) and has now been converted for a number of residential units.	0242
Blackdown Mill, Leamington	WAR Hill Wootton Road, Leamington Spa	151 SP311691	Power:Water	V	Long history of milling on the site with activity probably ending in the 1920s. Current building is a mix of 18th and 19th century buildings and later conversions. Oldest part is the three storey brick building housing the remains of a low breast shot wheel, viewable through a grille beneath a stone arch. Wooden extension plus elaborate doors and balconies create a unique building, together with chimney and large flywheel (associated with steam power installed in the mid 19th century) at the rear of the building. Original mill race filled in. There have been further alterations in recent years at the rear of the building which is now used for accommodation.	0147
Guy's Cliffe (Saxon) Mill	WAR Coventry Road, Warwick	151 SP291671	Power:Water	V	Reputedly of Saxon origin, a mill has long existed on this site, with a granary attached. The mill buildings are of stone with brick additions, particularly to the rear. Previously two waterwheels but only the smaller one remains. The iron axle of the main wheel is mounted on the wall adjacent to the mill pool, and two millstones are in evidence. The mill closed in 1938 and was converted to a restaurant in 1952. but the mill retains its attractive setting and is a popular venue for visitors.	0224

Rock Mill, Leamington Spa	WAR Rock Mill Lane, Leamington Spa	151 SP301662	Power:Water	V	An important site, for in 1792 it was constructed by Benjamin Smart as a cotton mill, very unusual for the county. It later converted to corn and eventually animal feedstuffs, and was extended in the late 19th century with an additional wing on the eastern end. It was run by Kench and Sons from 1888 to 1961. The mill is a four storey building with attics, with the remains of two breast-shot wheels and a chimney on the western end associated with later conversion to steam power. Ground floor constructed of stone with brick upper floors with stone dressing. It has recently been converted to accommodation with additional new properties built at the rear of the mill. Fine (stone and brick dressing) mill house to the east of the mill.	0144

Warwick Castle Engine House	WAR Warwick Castle grounds	151 SP284646	Power:Water	O	A watermill had been in existence on the site since the 14th century, supplying corn to the castle but in 1894 a re-building created a facility for the generation of electricity from water power. This was done via the 19th century low breastshot water wheel and a water turbine (of which little remains) with links to dynamos and thence to batteries. This is an early example of the generation of hydro-electric power, used for the provision of lighting for the castle and also to power electric vehicles and an electric boat. Gas engines were also used. There was also an electrically powered pump for supplying water for fire hydrants to the castle and the town. The engine house was abandoned in 1954 but a recent restoration seeks to illustrate these various methods of generating power, with some original material and some engines brought in from elsewhere to illustrate what would have been present. The latter include a Crossley gas engine with throttle governing gear, originally from the Co-op Dairy Association, Fenwick, Kilmarnock and a Crossley cold start oil engine from High Royds Hospital, Menston, W. Yorkshire. Admission is via entry ticket to Warwick Castle.	0215
Tuttle Hill Windmill	NUN Tuttle Hill, off B4114 road	140 SP341932	Power:Wind	V	A 4-storey red brick tower mill with the top cemented over. Originally 4 sails; rebuilt in 1905 with 5 sails. The last working windmill in Warwickshire, ceasing work in 1936 after storm damage. Currently used as a store.	0103
Thurlaston Windmill	RUG Church Lane, Thurlaston	140 SP469710	Power:Wind	V	Tall (5-storey) tapering red brick tower built in 1794. Milling ceased in 1920s. Now converted to a house with modern tiled conical roof.	0127

Berkswell Windmill	SOL Windmill Lane, Balsall Common	139 SP249759	Power:Wind	O	A tower mill standing on a low mound and surrounded by a circular wall. A red brick tower with a boat shaped cap. Two common sails and two patent sails spanning 60ft. Two pairs of stones. Built in 1826 and worked by wind until 1927. Recently restored.	0014
Chesterton Windmill	STR Chesterton	151 SP348594	Power:Wind	V	A unique tower windmill dating from 1632. The circular arcaded base of the windmill is surmounted by the first floor housing the two pairs of stones above which is the rotating domed timber cap with four common sails with a diameter of 60ft. Built for Sir Edward Peyto.	0005
Harbury Windmill	STR In Harbury village.	151 SP373600	Power:Wind	V	A 60ft high tower mill, the tallest in Warwickshire. Built about 1805 with three pairs of stones. Worked until the early 20th century when the sails were removed and a steam engine (later electrical power) substituted. Now converted into a dwelling.	0050
Kineton Windmill	STR Pittern Hill, Kineton	151 SP325517	Power:Wind	V	A tower mill built of stone, now much patched with brick, with dome cap. Long out of use as a mill.	0148
Upper Tysoe Windmill	STR Upper Tysoe/Compton Wynyates	151 SP331426	Power:Wind	V	A (surprisingly small) 12 sided stone tower built in the 18th century with conical cap, located half a mile from the nearest road. Restored in the 1970s.	0150
Rowington Windmill	WAR Rowington Green	139 SP205702	Power:Wind	V	Late 19th century small three storey red brick tower mill. Converted to residential use with replacement roof and windows. Known as 'Bouncing Bess'.	0167
Danzey Green Windmill	ZMU At Avoncroft Museum of Buildings Bromsgrove	139 SO952683	Power:Wind	O	A post mill originally situated at Danzey Green, Tanworth in Arden in Warwickshire. Disused since the 1870s, it was removed to Avoncroft Museum of Buildings in 1969 and restored to use. Four sails spanning 60ft, originally common sails but rebuilt with two common and two spring sails. The upper part of mill is mounted on a massive timber post and is rotated by a hand winch.	0054

Coat of Arms Bridge	COV Coat of Arms Bridge Road, Coventry	140 SP325767	Rail:Bridges	A	A masonry arch bridge carrying the line of the Coventry to Leamington railway line over Coat of Arms Bridge Road. Built 1844. Bears the coat of arms of the Gregory family who owned the land through which the railway passes. Engineer Robert Dockray.	0002
Abutment of the 'Birdcage Br.'	RUG Abbey Street, Rugby	140 SP516757	Rail:Bridges	A	The remaining abutment of the bridge which carried the Great Central Railway line over the London & North Western Railway (now the West Coast Main Line). The bridge was a large steel girder bridge which was demolished in recent times and known as the 'Birdcage Bridge'. Opened in 1899 the line continued northwards over a long viaduct before crossing the Oxford Canal. A large signal gantry was erected over the L.N.W.R. lines at the expense of the G.C.R.The area to the right hand side was a mecca for railway enthusiasts spotting locomotives on the W.C.M.L., the G.C.R and from the Rugby Test House nearby.	0298
Leicester Line Viaduct	RUG A426 Leicester Road, Rugby	140 SP502766	Rail:Bridges	V	A viaduct with 11 elliptical arches approximately 700 ft long which carried the Midland Counties Railway between Leicester and Rugby over the Leicester Rd. Engineered by Charles Vignoles and opened in 1840. Red brick with facings of Staffordshire blue brindles and sandstone dressings.	0290
Leicester Line Viaduct Footway	RUG A426 Leicester Rd. Rugby	140 SP502766	Rail:Bridges	A	Leicester line viaduct (see 0290 for description) reopened to cyclists and pedestrians in 2007 by Rugby Council. Listed Grade 2 in 2000.	0291

Priory Road Bridge	RUG Priory Road, Wolston	140 SP420161	Rail:Bridges	A	An unusual bridge in red and blue brickwork dating from the opening of the London & Birmingham Railway in 1838 which carries a trackway (public footpath) under the line of the railway. Single span brick four-centered 'Tudor' style arch with a skew angle of 30 degrees. Square span 18ft 2in, skew span 21ft. Interesting skew brick coursing in arch. Six ring brick arch stepped in pairs spings from vertical side walls 7ft 6in. high with a much weathered sandstone decorative string course at the springing. Bridge is 33 ft wide with an overall maximum clear height in the centre of the arch of approximately 14ft 6in. Brick parapet walls with stone capping set away from the bridge on a 'corbelled' solid stone course. Wing walls of various configurations, the wall on the NW side is supported by a (modern) concrete buttress. The base of both wing walls on the south side is supported by a low brick wall 2ft 2in high with a grassed area between the two walls. Modern concrete roadway under the bridge. The section of the line on which the bridge stands was opened in April 1838. The Designer was Robert Stephenson and the Contractor was Samuel Hemmings (who failed and the work was taken over by the Company). Bridge No. RBS1/297.	0321
Viaduct, Avon Street Rugby	RUG Avon Street, Rugby	140 SP523755	Rail:Bridges	P	This 13 arch viaduct was situated on the Rugby to Market Harborough railway line which opened in 1878 to allow trains to avoid a level crossing of the L.N.W.R. Northampton and London lines. It is now in the middle of a golf course. Passenger trains were withdrawn in 1966.	0300
Wolston Railway Bridge	RUG Priory Road, Wolston	140 SP419760	Rail:Bridges	A	A Tudor style arch bridge carrying the London & Birmingham Railway over Priory Road, Wolston. Skew arch. Blue brick with stone dressing. Engineer Robert Stephenson.	0197

Wolston Viaduct	RUG In Wolston Village on Coventry to Rugby railway line.	140 SP409761	Rail:Bridges	V	An original structure on the London & Birmingham Railway, dating from about 1837. Nine main semi-elliptical arches in brick with stone facings. At each end are smaller arches of 10ft span. Designer Robert Stephenson	0020
Wood St. Footbridge, Rugby	RUG Wood Street, Rugby	140 SP506761	Rail:Bridges	A	A new structure opened in June 2009 to replace an earlier timber and riveted footbridge (the 'Black Path') which gave access over the tracks east of Rugby Station. Originally gave access to the BTH factory complex but now connects Wood Street to the Webb Ellis Business Park and Industrial Estate.	0296
Tramway Bridge	STR Over River Avon in Stratford upon Avon	151 SP206548	Rail:Bridges	A	A nine arch brick bridge built in 1826 to carry the line of the Stratford and Moreton Tramway over the River Avon. It was the largest structure on the tramway which was one of Britain's earliest railways. Engineer James Rastrick. Now used as a public footpath.	0010
Umberslade Hall Drive Bridge	STR Umberslade Hall Drive, Tanworth in Arden	139 SP119709	Rail:Bridges	A	A bridge carrying the line of the GWR line from Tyseley to Stratford over the drive to Umberslade Hall . Three masonry arch spans on an acute skew angle, arches semi-elliptical in form in finely dressed sandstone ashlar. Built about 1908. Engineer was H.D.Smith, Contractor was C.J.Wills & Son.	0027
Common Lane Railway Bridge	WAR Common Lane, Kenilworth	140 SP298731	Rail:Bridges	A	A blue brick arch bridge over the former Kenilworth Junction to Berkswell railway line carrying Common Lane, Kenilworth. Now over part of the Greenway and cycle route with access from Coventry Road, Kenilworth.	0189
Common Lane Railway Bridge	WAR Common Lane, Kenilworth	140 SP298731	Rail:Bridges	A	A railway bridge of stone construction at Common Lane, Kenilworth. Crosses the Coventry to Leamington railway line at the former Kenilworth Junction.	0185

Hollis Lane Bridge Kenilworth	WAR Hollis Lane, Kenilworth	140 SP285744	Rail:Bridges	V	An interesting blue brick skew railway bridge at Hollis Lane, formerly used to carry the Kenilworth Junction to Berkswell railway line. The bricks under the arch are laid on the diagonal. The line closed in the 1960s and is now part of the national cycle route network.	0355
Hunningham Railway Bridge	WAR On trackway south of Hunningham	151 SP383665	Rail:Bridges	A	An unusual bridge carrying a trackway over the line of the LNWR railway from Leamington to Rugby. Built 1850, Engineer W.T.Doyne. Originally a 150ft span lattice girder bridge (longest in the world) but later propped at the third points by a complex arrangement of four lattice columns thus converting it into a three 50ft span bridge. Listed Grade 2*.	0033
Kenilworth Common Viaduct	WAR Kenilworth Common, Kenilworth	140 SP296728	Rail:Bridges	A	A brick viaduct crossing Finham Brook on Kenilworth Common. Tie bars and plates visible. Carries the Coventry to Leamington railway line.	0186
Leamington High St. Bridge	WAR High Street/ Bath Street Junction Leamington Spa	151 SP320652	Rail:Bridges	A	A large steel (?) railway bridge carrying the Leamington to Banbury railway line over the High Street/Bath Street/Clemens Street junction. An unusual configuration. The north girder has a single span of about 136ft. The centre girders cross in two spans of about 84ft supported by a single steel rivetted column and the south girders cross in two spans of about 100ft supported by a brick pier. The outer girders are hogged back rivetted lattice trusses, the centre girders are similar rivetted plate girders. It is uncertain if the present bridge is the original bridge of 1852 which was designed by Brunel with T.H. Bertram as Resident Engineer and Peto & Betts as Contractors. The present bridge may be a rebuild of unknown date.	0077

Crossing Keeper's Cottage	NOR Quarry Lane, Mancetter	140 SP318964	Rail:Buildings	V	A crossing keeper's cottage built circa 1847 for the Trent Valley Railway. Designed by J.W. Livcok who was also responsible for Atherstone Station. Attractive building of red brick with stone dressing, 'fish-scale' roof tiles and Dutch gables. Later replaced by a bridge over the line., Now a private house with extensions to the original cottage.	0338
Maxstoke Station	NOR Maxstoke, North warwickshire	140 SP212885	Rail:Buildings	V	Coleshill station was opened by the Birmingham & Derby Junction Railway in 1839 to link Derby, via Whitacre Junction with Hampton in Arden from where trains travelled over the London & Birminham Railway's line to Curzon Street. The line lost its importance when the B.& D.J.R. opened its own direct route into Biringham in 1842. Closed to passenger taffic in 1917. In 1923 the station was renamed Maxstoke and retained as a goods facility until final closure in 1939 with the line being finally lifted in 1952. One platform with sloping ends is still visible, the red brick building and level crossing is long gone.	0354
Railway Station, Atherstone	NOR Long Street, Atherstone	140 SP304979	Rail:Buildings	V	Built in 1847 as part of the Trent Valley Line. Designed by J.W.Livock. Brick building with limestone dressings and interesting architectural detail - patterned brickwork, steeply pitched tiled roofs with decorative chimney stacks and finials. Saved from demolition in the 1980s. Now offices, external viewing only.	0096

G. C. Raliway Station (Site of)	RUG Hillmorton Road, Rugby	140 SP514745	Rail:Buildings	A	The remains of the Great Central Railway Station opened in 1899 and closed in 1969. Typical G.C.R. station with island platforms with one up and one down. Freight pens on the left hand side of the main line. Booking Office situated at road level, platforms accessed by a staircase from the Booking Office. Now part of a nuature walk. Line wasa between London Marylebone and Sheffield via Leicester and Nottingham. Opened in 1899 and various sections closed during the 1960s.	0297
Rugby Station (a)	RUG Murray Road, Rugby	140 SP511759	Rail:Buildings	A	The present Rugby Station was originally opened in 1885 and has been extensively modernised following the new track layout in the early 2000s. There is a new booking hall with cafe, toilets etc. which replaces the same, but much larger, facilities on the main island platform. The present station replaced two earlier stations to the west of the present site. Large steel and glass roof replaced in the early 2000s by modern 'gull wing' roofs over the platforms only.	0294
Olton Station, Solihull	SOL Station Drive, Olton, Solihull	139 SP133822	Rail:Buildings	V	Original GWR station of 1869 re-modelled in 1933. Brick built booking hall with stone dressing, formerly with canopy fronting Station Drive. Tiled booking hall and underpass.	0212
Station Road Level Crossing	STR Station Road, Long Marston	151 SP155478	Rail:Buildings	A	A level crossingoin the site of the former Long Marston station on the G.W.R. Brimingham, Stratford upon Avon, Cheltenham and Bristol route. Closed in the Beeching era.	0196

Curdworth Tramway Route	NOR Curdworth Bridge, Curdworth	140 SP186918	Rail:Tramways	A	There was once a mineral tramway running underneath Curdworth Bridge along the bank of the River Tame at this point. The tramway was part of the extensive network around Minworth water treatment works. The track was still in place in the 1970s and at least one of the small diesel locomotives is in preservation. The inset photographs (album ref. 0201) show the track in situ in the 1970s. The main photograph is taken from Curdworth Bridge. The metal bridge in the small photograph is visible in the back ground of the main photograph.	0201
Stratford Tramway Track	STR Stratford, south of the River Avon through parkland	151 SP203546	Rail:Tramways	A	The route of the Stratford & Moreton Tramway in Stratford, now a public footpath. From canal basin crosses the River Avon by means of the Tramway Bridge (q.v.) then on a low embankment through parkland at the rear of houses on the A3400 road. Tramway originally opened on 5th September 1826. Horse drawn throughout until the conversion of the section between Moreton and Shipston on Stour by the G.W.R. in 1889.	0068
Tramway Wagon	STR On Tramway Bridge footpath at Stratford upon Avon	151 SP207549	Rail:Tramways	A	Tramway wagon from the Stratford & Moreton Tramway now sited on the old tramway bridge over the River Avon at Stratford. Maximum laden weight 4 tons. Woodwork recently restored. Horse drawn. Stands on a typical section of fish-bellied rail.	0060

Maglev Carriage, Burton Gr'n	SOL Field off Hodgetts Lane, Burton Green	140 SP265762	Rail:Vehicles	V	One of the carriages from the 'Maglev' (Magnetic Levitation) system that operated at Birmingham Airport from 1984 to 1995. The track length (between Birmingham International railway station and the Airport Terminal) was 600 metres and trains 'flew' at an altitude of 15 mm., levitated by electromagnets and propelled by linear induction motors. Increased unreliability and the obsolescence of electronic equipment caused its closure. The carriage was purchased by a private individual and placed on private land but can be seen from Hodaett's Lane.	0213
Electric Railway Museum	WAR Rowley Road,	140 SP353751	Rail:Vehicles	O	The Electric Railway Museum is home to the largest collection in the UK of preserved Electrical Multiple Units (EMUs) drawn from a variety of sources. Many of them are available for visitors to go inside and sample the travelling experience of days past. Also a small number of industrial electric and diesel locomotives. No particular local connections. Various railway buildings are also available to visit. Open to visitors on selected days of the year from April to October. Admission is free.	0266
Swimming Pool Roof	WAR At rear of Pump Room, Leamington Spa	151 SP318657	Recreation:Roof	O	Swimming Pool built in 1890 by William de Normanville. An iron and timber roof spanning 60ft and 120ft long. Hipped roof at the east end and a five sided apse at the west end. Timber purlins and rafters with iron trusses. Trusses have cast iron compression members and wrought iron tie rods. Two tensioned tie rods 2 in diameter connect the ends of the roof. Complex castings where the end trusses meet at the apex of the roof. Now converted to the Public Library.	0040

Furnace End Bridge	NOR B4114 Road, Furnace End	139 SP248913	Road:Bridges	A	A single span bridge with a ribbed arch over the River Bourne. Span about 12 ft. Medieval but the bridge has been widened on the east side and it is now nearly impossible to see the original arch.	0015
Packington Park Iron Bridge	NOR Packington Park Estate, Great Packington	140 SP223837	Road:Bridges	P	A circa 19th century cast iron bridge with two spans and stone abutments at both ends. Wooden decking. Ornate railing decoration to both spans. This attractive bridge spans the waterway and weir that connects the Great Pool built 1619-40 and the Hall Pool built by Capability Brown between 1752 and 1768.	0345
Polesworth Bridge	NOR Polesworth, over River Anker	140 SP261023	Road:Bridges	A	A bridge designed by Thomas Sheasby senior. Ten semi-circular arches , spans between 15ft 8in and 20ft 9in. Built in 1776. Widened on the east side in mass concrete in 1924. Parpet stone inscribed 'HL 1776 TS'. The HL almost certainly refers to Henry Lakin.	0016
Shuttington Bridge	NOR Tamworth to Shuttington road over River Anker (on County boundary)	139 SK249051	Road:Bridges	A	Six span masonry arch bridge. Spans 1 and 6 are flood arches, spans 2,3,4 and 5 over River Anker. Two different periods - old south-western section (spans 1 to 3) in sandstone ashlar with three unequal spans abuts the newer north eastern section (spans 4 to 6) with three unequal brick arches. The newer section rebuilt in 1816, older section may be much older and there are records of repairs to the bridge from 1650.	0079
Water Orton Bridge	NOR Over River Tame at Water Orton	139 SP174914	Road:Bridges	A	Dates from 16th century with six segmental arches in sandstone. Spans vary from 13ft 6in to 14ft 2in. Cutwaters form pedestrian refuges. Unusual in not having been widened.	0017
Kings Newnham Bridge	RUG Kings Newnham to Church Lawford Road over River Avon	140 SP449770	Road:Bridges	A	Two span brick arch bridge. Unusually the arches are of different spans, 21ft 3in and 16ft 6in. Pier is sandstone ashlar with a triangular cutwater. Built about 1800.	0078

Mill Bridge, Rugby	RUG Rugby, on A426 1km north of Rugby town centre	140 SP501763	Road:Bridges	A	A three span masonry arch bridge over the River Avon. The original bridge, dating from the 18th century is on the SW side of the present bridge. Brick arches with sandstone facings. Widened on the NE side in 1857 with matching arches. Modern reinforced concrete footway extension on the NE face.	0057
Pedlars Bridge	RUG Off Smeaton Lane 1km NNW of Brinklow	140 SP429806	Road:Bridges	A	A packhorse bridge now a footbridge over the Smite Brook. Two semicircular arches in sandstone ashlar Spans about 6ft. Rebuilt 1873. 5ft 6in wide, 3ft 8in between brick parapet walls.	0059
Barston Bridge	SOL Barston Lane, Barston	140 SP216783	Road:Bridges	A	An interesting brick and stone twin arch bridge spanning the River Blythe. Modern brick parapet on the north side and metal railing on the south side. The bridge received serious damage from a road vehicle. The north side parapet contains a stone plaque with the wording 'Erected by public subscription 1859 Samuel Brett Shirreff Rector' There is also an Ordnance Survey arrow bench mark.	0356
Hampton Packhorse Bridge	SOL On lane between Bradnocks Marsh and Hampton in Arden	139 SP215801	Road:Bridges	A	A packhorse bridge only 6ft wide over the River Blythe. Five masonry arches, three pointed arches and two segmental arches. Spans from 9ft 9in to 10ft 2in. Bridge probably dates from the 15th century and has been extensively repaired.	0021
Bidford Bridge	STR On B4085 road over River Avon at Bidford	150 SP099518	Road:Bridges	A	A late medieval bridge dating from the 15th century. Eight main arches and one flood arch. Arches have various forms and spans, having been rebuilt over a long period of time. The seven triangular cutwaters are extended upwards to form pedestrian refuges.	0022

Clopton Bridge	STR On A34 road over River Avon at Stratford.	151 SP206548	Road:Bridges	A	Dates from about 1485. 14 arches, part segmental with a slight point with spans varying from 18ft 6in to 18ft 0in. Widened in 1814 by building new arches 5ft 3in wide on new piers. 1827 a cast iron footway was added on the upstream side.	0023
Compton Verney Bridge	STR On drive leading to Compton Verney off B4086	151 SP313529	Road:Bridges	O	Three segmental arches in ashlar masonry. Designed by Robert Adam, built in the late 18th century.	0051
Deppers Bridge	STR East of Deppers Bridge over River Itchen	151 SP400593	Road:Bridges	A	Reinforced concrete beam bridge built 1939. Single span of 22ft 6in (square) on a 60 degree skew. Date stone in south parapet wall.	0073
Hampton Lucy Bridge	STR Hampton Lucy over River Avon	151 SP258572	Road:Bridges	A	A cast iron arch bridge with a single span of 60ft. Four arch ribs each of four segments with bolted joints. Ironwork cast by Horseley Ironworks, design probably by William Mackenzie. Contractor Thomas Townshend.	0025
Honington Bridge	STR South west of Honington village over River Stour	151 SP263422	Road:Bridges	A	Masonry arch bridge in yellow sandstone with 5 unequal spans. All arches segmental but the two NE arches have smaller arches underneath - possible widening? The easternmost arch is almost completely blocked. Stone parapet with ornamentation of stone balls on plinths. Pevsner considers the bridge may be earlier than 1682.	0075
Long Itchington Stone Bridge	STR Stonebridge Lane, Long Itchington	151 SP406650	Road:Bridges	A	Three segmental arches in sandstone ashlar carrying a minor road over the River Itchen. Red brick piers. Spans are 9ft, 14ft 3in, 9ft. Large cutwaters on upstream face, buttresses on downstream face of piers. Modern raked steel handrails.	0071
Marton Bridge	STR Marton village, over River Leam	151 SP407691	Road:Bridges	A	A two span masonry arch bridge with segmental pointed arches dating from 1414 with two nearby flood arches. Scheduled Ancient Monument. Recently restored to its original configuration by Warwickshire County Council.	0056

Snowford Bridge	STR Long Itchington to Hunningham road over River Itchen	151 SP399664	Road:Bridges	A	A three span brick arch bridge, segmental arches with spans of 10ft 2in, 17ft, 10ft 2in. Blue brick arch rings, remainder red brick. Built 1868, repaired 1900.	0080
Tidmington Bridge	STR On A34 road 2km. S of Shipston on Stour over River Stour	151 SP261383	Road:Bridges	A	Three span bridge widened on the east side. Original bridge has semicircular brick arches of 12ft, 16ft and 12ft span. Cutwaters on brick piers. Northern arch has a larger radius arch above the main arch. Widened on the west side by reinforced concrete beams supported on concrete blocks on the tops of the cutwaters. Widened on the east side by casting concrete arches to the same form with red brick spandrels and abutment walls.	0065
Tidmington Pack Horse Bridge	STR On County boundary over Knee Brook on footpath between Todenham and High Furze	151 SP245375	Road:Bridges	A	A packhorse bridge with two masonry arches, the north arch is pointed 10ft span, the south arch is semi-circular 11ft span. Overall width of bridge is 7ft. Modern tubular steel post and single rail parapet May date from 1615. Listed Grade 2.	0067
Wixford Bridge	STR B4085 road Wixford over River Arrow	150 SP087546	Road:Bridges	A	A brick bridge with a single segmental arch of 65ft span. Arch ring is 30in thick. Designed by Henry Couchman senior. Completed in 1801. A fine example of brick arch construction.	0029
Barford Bridge	WAR Barford, N of village over River Avon.	151 SP268610	Road:Bridges	A	A five arch bridge dating from the 18th century now bypassed by a modern concrete bridge.	0061
Crackley Pedestrian Tunnel	WAR Near Crackley Hill, Coventry Road	140 SP295736	Road:Bridges	A	A blue brick pedestrian tunnel under the former Kenilworth Junction to Berkswell railway line. Now part of the Greenway route. Access from Coventry Road, Kenilworth.	0184

Great Bridge, Warwick Castle	WAR Mill Street, Warwick	151 SP285646	Road:Bridges	V	Remains of a late medieval stone ashlar bridge marking an early crossing of the River Avon beneath the walls of Warwick Castle. Three arches in the river with fragments on each bank and cutwaters upstream and downstream on the piers. Replaced by a later bridge upstream, opened in 1793 (see entry No. 41). Distant view from this new bridge but best seen either from Mill Gardens or the bottom of Mill Street (entry fee) or from Warwick Castle (large entry fee).	0359
Grecian Lodge Bridge	WAR On drive leading to Stoneleigh Abbey from B4115 road	140 SP317715	Road:Bridges	O	Built in 1813, an elegant masonry arch bridge with a single segmental span of 91ft and two small side arches. Designed by John Rennie for Lord Leigh.	0039
Hunningham Bridge	WAR Hunningham Road, Leamington Spa	140 SP372685	Road:Bridges	A	Built circa 1651. Sandstone ashlar with 3 semi-circular arches with cutwaters. Spans the river. 2 further semi-circular flood water arches on the west bank. Plain parapet with 2 pairs of splayed refuges off the roadway on each side in the cutwater piers. Said to have been probably built by the monks of Stoneleigh Abbey.	0348
Leafield Bridge	WAR On private road south-west of Warwick	151 SP280630	Road:Bridges	P	A near twin of Castle Bridge at Warwick but built earlier in 1776 to a design by Robert Mylne. A single 102ft span segmental arch in banded ashlar masonry. Restoration needed.	0034
Mill Road Bridge	WAR Jephson Gardens, Leamington Spa	151 SP322656	Road:Bridges	A	A suspension footbridge between Mill Road and Jephson Gardens. Built 1903, designed by William de Normanville. Span 100ft. The bridge is supported by wrought iron rods extending from the tops of the two towers to the handrail truss, a design which foreshadows the modern cable stayed suspension bridge.	0008

Portobello Bridge	WAR Over River Avon on A445 Warwick	151 SP301658	Road:Bridges	A	Opened in May 1832 with two 60ft arches. In 1892 the arches were rebuilt in brick with stone facings following the sinking of the crowns of the original arches. Widened on both sides with an iron footway on the north side and modern widening on the south side.	0036
Princes Drive Bridge	WAR Over River Leam on Princes Drive, Leamington Spa	151 SP309655	Road:Bridges	A	A relatively early reinforced concrete bridge opened on 14th June 1923 to a design by the Trussed Steel Concrete Co. Three 39ft 5in spans over the river with two flood spans to the north. There are ten beams across the width of the bridge supported on six reinforced concrete columns with transverse beams connecting the tops.	0037
Stare Old Bridge	WAR On B4113 1 mile south of Stoneleigh	140 SP329714	Road:Bridges	A	This bridge, with nine arches of varying sizes and styles dates from 14th or 15th century. The five southernmost arches, the first three of which cross the river, have pointed arches, the next two arches are segmental and the two northernmost arches are pointed. The roadway, now confined to pedestrian use, is only about 10ft wide.	0044
Stoneleigh Abbey C. I. Bridge	WAR Grounds of Stoneleigh Abbey	151 SP316711	Road:Bridges	O	The bridge spans over the River Avon in the grounds of Stoneleigh Abbey. Two spans with cast iron beams about 44ft. long, fish bellied, 20" deep at the ends and 24" at the centre. Lateral connection by cast iron cross beams and tie rods. Cast iron plate deck. Overall width 8ft 4in. Originally the cast iron beams, which are of a complex cross-section., contained large timber beams, held in position by a complex set of brackets. The reason for this is unknown and this form of construction may be unique. The date of the bridge is uncertain but 1821 is a possible date. The bridge has recently been	0308

Mileposts, A3400	STR Stratford to long Compton road	151 Various	Road:Streetfurniture	A	In 2011, buried in a thick hedge by a stretch of the A3400 near Little Wolford one of a series of nationally unique 10' tall cast iron mileposts was re-discovered. There were three others still in position elsewhere along the former Stratford to Long Compton turnpike (1730-1877) and a fifth broken to pieces but rescued at Newbold on Stour. To complete the set there was a sixth of unknown origin at the Shipston on Stour Museum. The Little Wolford post was granted Grade 2 listed status in December 2011. This added impulse to a plan to restore all six posts. Speculation had abounded as to what they actually were. One theory was that they were for use by mail coaches. Bags of post would be suspended from the arms for onward local delivery. The mystery was solved when a photograph was uncovered at trhe Shakespeare Birthplace Trust. It was of the Shipston on Stour Picture House from just before WW1 and alongside it was the Shipston post complete with its milpost direction board inserted in the top castings. Now we had evidence not only of the shape and size of the direction board but also the typeface in use. Leander Architectural was appointed for the restoration and RM Installations to deal with extraction, transport and re-erection. We had nothing but full co-operation from Paul Cowley and his team at W.C.C. Highways. W.C.C. provided full surveys of services at the location of the posts and consent for the work. We had good support from landowners, Parish Councils and Long Compton and Shipston History societies. Long Compton PC provided an original site for the post after its restoration. IIn early 2017 work began at Leander and went very well. The posts were collected by RMI and re-erected at their sites all in one day. There is just one abiding problem - we still do not know who made the posts or when.	0375

Tollgate Cottage Warwick	WAR Gallows Hill, Warwick	140 SP291642	Road:Tollhouses	V	A single storey 19th century stone toll house with Gothic arches to doors and windows. Sympathetically modernised and extended, it now occupies an island within a redesigned road junction.	0125
Hattons Hat Factory	NOR Rear of Long Street, Atherstone	140 SP307979	Textiles: Hats	V	One of the few surviving buildings of Atherstone's hat making industry. The firm of W.A.Hatton was established in 1871 and in 1899 moved to the Long Street premises (originally built for Messrs. Sharrot & Furnace in 1873). Hattons remained in business until 1956 since when the buildings have been used for a variety of light industrial purposes. An Historic Building Record was carried out by Birmingham Archaeology in June 2009 prior to redevelopment of the site for housing. Five remaining buildings were identified as premises of Hattons, typically small scale, utilitarian in design with generous fenestration to provide natural light.	0097
Victor Works, Atherstone	NOR Station Street, Atherstone	140 SP306978	Textiles:Hats	V	Footwear (slipper) works developed on the site of a former hat making premises. Originally part of Willdays, taken on by Hall and Phillips, and then by Joseph Lester Vero as a slipper manufactory (until 1988). Inscribed 'Victor Works' above the entrance. Now converted to a variety of other uses including a night club. Forms part of a group of buildings that represent a remnant of the once typical industrial townscape of this part of Atherstone.	0088
Wilson & Stafford Hat Factory	NOR Coleshill Road, Atherstone	140 SP306974	Textiles:Hats	V	The last hat factory operating in Atherstone, closing in 1999. The site dates from 1828 but there have been several additions since then to create a mix of buildings. An interesting series of 19th century buildings fronting Coleshill Road with a high proportion of glazing in the ranges facing the Coventry Canal. Suffered from neglect, vandalism and fire but currently (2014) being considered for redevelopment.	0099

Toye, Kenning & Spencer	NUN Newtown Road, Bedworth	140 SP352869	Textiles:Hats	O	On of the most important textile sites remaining in the county, specialising in regalia for civil and military markets. With origins in London in 1685, in the 20th century the firm moved its textile-based operators to Bedworth and its metal-based manufacturing to the Birmingham Jewellery Quarter. The firm is still in production in Bedworth, specialising in narrow fabric weaving (such as ribbons and braids), hand and machine embroidery and crafted hats and caps. The site has a range of buildings of dfferent ages with the older buildings at the rear. Important examples of textile machinery are contained within these buildings. No access to the factory, but the shop is housed in the more modern block at the front and is open to visitors in the working day.	0219
Ribbon Factory Coventry	COV New Buildings, Coventry	140 SP335791	Textiles:Ribbon	V	Built in the mid-19th century with later additions, this former ribbon factory is three storeys high with the basement, opening out at ground level to the rear of New Buildings. Built of red brick with slate roofs, it has the characteristic large windows utilised in the weaving industry. Attached to the south-west of the factory is the office or manager's house, two storeys high. After weaving had finished the buildings transfferred to other uses before being converted to accommodation and a bar/restaurant in 2002.	0358

Cash's Cottage Factory, Cov.	COV Cash's Lane, Coventry	140 SP336806	Textiles:Silk	V	Quakers John and Joseph Cash decided in 1857 to move their ribbon weaving business to a site in Kingfield alongside the Coventry Canal. They created a model factory with two rows of three storey terraced cottages with living space on the first two floors and top shops on the third. The individual workshops were converted to a single factory in 1862. Steam powered beam engine for the looms throughout. 100 cottages were planned but only 48 were built and some of these were lost to wartime bombing. One row faces Cash's Lane, the other faces the canal. Red brick with barge boarded gables in centre and at either end and top shops well lit via large windows. Cash's moved elsewhere in Coventry and the cottages are now housing.	0115
Coventry Top Shops	COV 67-72 Far Gosford Street	140 SP345790	Textiles:Silk	V	Three storey red brick terraced houses with top shops on the second floor with generous supplies of light through the large (7 x 5 pane) windows. Used for weaving and ribbon making. Built in the first half of the 19th century. Shops now occupy the ground floor and recent renovation has included new window frames.	0113
Herbert Art Gallery	COV Jordan Well, Coventry	140 SP337789	Textiles:Silk	O	The Herbert contains a range of material relating to the history of Coventry industries. Most significant is the unique collection relating to the ribbon weaving industry including over 250 sample books, with 80 from Franklin and Son and about 50 from J and J Cash. The collection has several thousand individual pieces of ribbon, dating from 1760 onwards. There are also ribbon designs and other archival material, together with weaving equipment, including a rare handloom and a large jacquard loom. There is material relating to other Coventry industries e.g. watchmaking and machine tools, and the Herbert houses the Coventry History Centre available for research purposes	0248

Topshops, Coventry	COV Lower Holyhead Road, Coventry	140 SP328791	Textiles:Silk	V	A row of workers' topshop cottages, with the typically larger top floor windows for maximum light for working purposes. Built in two phases, the lower row (13-23) was built in 1819; the higher row (25-29) in 1837. Formed part of a longer row truncated by the building of the Inner Ring Road. Used by workers in the ribbon weaving (and/or watchmaking?) industry.	0246
Topshops, Hurst Road	COV Hurst Road, Longford, Coventry	140 SP351838	Textiles:Silk	V	A row of three storey red brick weavers' cottages with former topshops now bricked up and replaced by smaller modern windows.	0124
Weavers' Cottages, Coventry	COV Berkley Road South, Earlsdon, Coventry	140 SP320778	Textiles:Silk	V	Unusual example of weavers' cottages in Earlsdon, primarily a watchmaking district. Three storey red brick building, with typical topshop windows (with modern window frames). With the decline of the ribbon trade after 1860, the cottages eventually became watchmakers' workshops. Part of the Earlsdon Heritage Trail.	0254
Albion Buildings, Nuneaton	NUN Attleborough Road, Nuneaton	140 SP368910	Textiles:Silk	V	Built in the 1840s for silk ribbon weavers. Originally three storey, but the top floor for the steam-powered looms has been removed. Brick built with stone facing around doors and windows. Later used by A.W. Phillips, tennis ball manufacturer, and Phillips Tuftex who made a range of sports goods. Southern section (towards Nuneaton town centre) have been renovated, whilst the northern section remains empty (2015).	0285
Top Shop, Bedworth	NUN Mill Street, Bedworth	140 SP356870	Textiles:Silk	V	Once a common sight in Bedworth, the Mill Street silk weaving topshops are a rare surviving example in the town. With modern rendering and changes in windows these are not obviously recognisable as topshops, but they did serve this purpose in the past.	0237

Top Shops, Bedworth	NUN Rye Piece, Bedworth	140 SP361868	Textiles:Silk	V	Two three-storey former silk weaving topshops. Once a common sight in the town, these are rare surviving examples of topshops in Bedworth. The first two floors are living quarters, the top floor housed the loom(s). Chequered red and yellow brickwork, with the original top windows (designed for maximum light) now replaced by smaller versions, although the previous dimensions can still be seen in the brickwork.	0238
Tower Court, Courtaulds Way	COV Courtaulds Way, off Foleshill Road, Coventry	140 SP339808	Textiles:Synthetic	V	Courtaulds opened a factory on the Foleshill Road in 1905 and expanded production facilities considerably over a number of years to become a major presence in the city. Since closure much of the site has disappeared but the remaining clock tower buildings (1912) have been converted into offices (with modern extension). The original buildings were constructed with distinctive deep red brick with terracotta detailing. They were previously attached to the laboratory block which has disappeared.	0151
Courtaulds Entrance Gate	NUN Marlborough Road, Nuneaton	140 SP367914	Textiles:Synthetic	V	One of the few remaining elements of the large Courtaulds factory, and its clock tower, that once dominated the skyline in this part of Nuneaton. Entrance gate with date 1920. Familiar deep red brick and terracotta. Other former Courtaulds buildings on Marlborough Road have been converted to other uses.	0152
Knitwear Factory, Atherstone	NOR Station Street, Atherstone	140 SP306978	Textiles:Wool	V	Previously used by Vero and Exeritt as a factory for making (principally) skirts as it diversified its hatting business. Three story brick building constructed in the early 20th century after fire destroyed previous premises. Now used for other purposes. Forms part of a group of buildings that represent a remnant of the once typical townscape of this part of Atherstone.	0089

Clothing Factory, Abbey Green	NUN Central Avenue, Abbey Green, Nuneaton	140 SP360922	Textiles:Wool	V	Originally built in 1910, this branch of Hart & Levy of Leicester occupies the corner site of Central Avenue and Bath Road. Largely re-built in 1946 after war damage, the factory made 'Harlevia' suits, coats and other outerwear. Frontage to Central Avenue with workshops behind. The Central Avenue facade has 'HART & LEVY Ltd.' engraved in stone over the entrance. After closure it has been occupied by other manufacturers, the most recent being Cascade Textiles (swimwear and garment manufacturer). The site is currently empty (2015).	0280
Cox's Timber Yard	STR Stratford upon Avon, between Tramway Bridge and Clopton Bridge	151 SP205549	Timber:Sawmill	V	A collection of buildings including chimney, with main (weather-boarded) timber warehouse constructed in ?1830. Two storey with attic, five bays with painted signs:'J.COX AND SON TIMBER MERCHANTS'. Now converted into Cox's Yard restaurant complex.	0120
Guy's Cliffe Racksaw	ZMU Avoncroft Museum of Buildings	139 SO951683	Timber:Sawmill	O	A racksaw from the Heber-Percy estate at Guy's Cliffe, dating from 1896. The large-toothed circular saw would have originally been powered by a steam engine.	0322

Chapelfields Watch District	COV Chapelfields, Coventry	140 SP320789	Watchmaking	V	The broadly triangular area that lies between Allesley Old Road, Hearsall Lane and Mount Street (including Lord Street, Duke Street and Craven Street) represents a unique district of watchmakers' living and working premises. Developed from the mid-nineteenth century, it was specifically designed for the industry, with accommodation for all classes, from leading manufacturers to the humblest journeyman. The masters' houses were located mainly on Allesley Old Road, with rows of terraced housing elsewhere for the workers performing the multitude of tasks involved in watchmaking. Viewing these houses from the front gives no real indication of the workshops that lie behind, often with typical topshop windows for maximum light. One place where this can be viewed is on Hearsall Lane looking up at the backs of the Craven Street properties. The Coventry Watch Museum has developed a Watchmaking Heritage Trail around Chapelfields, with blue plaques on several properties, covering all types of accommodation. These sites are recorded as individual entries elsewhere in the database.	0268
Coventry Watch Museum	COV Court 7, Spon Street, Coventry	140 SP328790	Watchmaking	O	The Coventry Match Museum Project - run by a group of dedicated volunteers - is geared to encouraging the study of the history of watchmaking in Coventry and to develop a Museum to reflect that goal. Premises in Spon Street were secured in 2002, and the plans are to develop this site over time.	0261

Rotherhams Offices, Coventry	COV Spon Street, Coventry	140 SP329791	Watchmaking	V	The offices of Rotherhams, the only surviving building of one of the largest watchmaking firms in Coventry. Founded in the mid 18th century, Rotherhams took the industry from top shop production into a factory environment. Three storey red brick with stone detailing. Blue plaque on the Coventry Watchmakers Trail.	0135
Watchmakers 28 Lord Street	COV 28 Lord Street, Chapelfields, Coventry	140 SP318789	Watchmaking	V	House and workshop of watchmaker Charles Read, who specialised in silver cased watches with gold (garter) inlay. Brickwork now rendered. Part of the Coventry Watchmaking Trail developed by Coventry Watch Museum.	0262
Watchmaker 13 Allesley O. Rd.	COV 13, Allesley Old Road, Coventry	140 SP320790	Watchmaking	V	These sizeable premises, with large workshops at the rear, were the home and factory of Philip Cohen 1874-1898. Cohen claimed that every part of all the watches he produced were made on these premises. He was a significant employer, and a prominent member of the Jewish community in Coventry. Some modernisation of the rear workshops has been carried out. Part of the Coventry Watchmaking Trail developed by Coventry Watch Museum.	0255
Watchmaker 164 Allesley O. Rd.	COV 164, Allesley Old Road, Coventry	140 SP315790	Watchmaking	V	The premises of W.H.Adams (1889-1953), thought to be one of the last watchmakers in Coventry. Part of the Coventry Watchmaking Trail developed by Coventry Watch Museum	0256
Watchmaker 21 Allesley O. Rd.	COV 21, Alledley Old Road, Coventry	140 SP319790	Watchmaking	V	Substantial residence and large rear workshop of watch manufacturers Thomas and (son) Rowland White, who operated on this site from 1851 to 1896. Part of the Coventry Watchmaking Trail, developed by the Coventry Watch Museum	0249

Watchmakers 35 Mount St.	COV 35, Mount Street Chapelfields Coventry	140 SP317788	Watchmaking	V	In this building the Coventry Co-operative Watch Manufacturing Society concentrated on assembling watches, using parts made by members of the Society	0247
Watchmakers House, Cov'try	COV 16 Norfolk Street, Coventry	140 SP327791	Watchmaking	V	Residence and workshop of Bahne Bonnicksen, watch manufacturer and inventor of the Karousel movement for watches and chronometers 1894. Modest two storey red brick house with workshop (with top shop windows) at rear accessed through (private) alleyway. Part of the Coventry Watchmakers Trail developed by Coventry Watch Museum.	0153
Earlsdon Water Fountain	COV Earlsdon Avenue, Coventry	140 SP323776	Water:Ancillary	A	Built in the 1860s by George Smith's Sun Foundry, Glasgow. One of a new generation of public drinking fountains designed to provide clean water as part of the war against water-borne diseases like cholera. Purchased by the City Corporation around 1970 and located outside St. John's Church in the City. Moved to its present location in 1921 shortly after the opening of the War Memorial Park close by. In use until the 1970s. After 150 years the fountain is again supplying clean fresh water and helping to reduce the number of plastic bottles in circulation.	0377
Lay-By, Holyhead Road	COV Holyhead Road, Coundon, Coventry	140 SP308801	Water:Ancillary	A	A lay-by on the north side of Holyhead Road originally constructed to enable water to be taken from the River Sherbourne by steam lorries operating from the flour mill in Cox Street Coventry. It was in regular use until circa 1949.	0372
Packington Park water	NOR Packington Park Estate, Great Packington	140 SP226836	Water:Ancillary	P	The Great Pool has an issue fed by a circular spillway which flows through a series of small (abandoned) weirs and ponds into The Hall Pool. A similar circular spillway at the western end of Hall Pool carries the water into the River Blythe.	0342

Packington Park water building	NOR Packington Park Estate, Great Packington	140 SP225837	Water:Ancillary	P	The Loin's Mouth is an attractive stone building situated at the northern end of the Great Pool, well below lake level. A conduit overflow came down from the lake allowing the water to flow through the mouth of a lion's head set into the arched building and onwards towards the Hall Pool. The conduit is no longer used. Thought to have been constructed in the late 18th century.	0343
Whitley Pumping Station	COV London Road, Coventry	140 SP357767	Water:Pumping	V	Built in 1893 to the design of John Hawksley, the Pumping Station housed two beam engines to pump water from the river Sowe to a reservoir. Fine gothic-style building, red brick (Websters) with stone dressing. Ornate porch carries the arms of the City of Coventry. Some adjacent buildings already demolished and the building is currently abandoned and in poor condition. Lodge at the entrance to the site built in similar style (and in similar condition).	0258
Whitacre Water Works	NOR Station Road, Shustoke	139 SP216912	Water:Pumping	V	Magnificent example of public works architecture on the grand scale. Pumping station functional from the early 1880s designed by Martin and Chamberlain for Birmingham Corporation. Ornate Venetian Gothic in style. Red brick with stone dressings with a variety of ornate windows. Tall gabled central part flanked by distinctive blocks with semi-conical roofs. After the Elan Valley scheme was completed in 1904 Whitacre was placed on standby and from 1908 was used to supply water to Coventry. Steam powered beam engines long since removed. Pumping station itself plus filter house, water well and Superintendent's house.	0114

Pump House, Bedworth	NUN Nicholas Chamberlain Almshouses, Bedworth	140 SP359870	Water:Pumping	V	The current Almshouses date from 1840 and the square brick and stone building in the centre of the quadrangle was the Pump House, supplying fresh water to the residents from the Halesowen Sandstone beneath. Two hand pumps were housed within the building (no longer operational).	0221
K'worth Common P. Station	WAR Kenilworth Common, near Forge Road, Mill End, Kenilworth	140 SP294728	Water:pumping	V	A water treatment pumping station built in 1884. Brick construction with pitched roof.	0188
Pumping Station, S. Abbey	WAR Stoneleigh Abbey estate.	151 SP316711	Water:Pumping	O	A stone built pumping station building for the Abbey lake. Due to be restored at a future date.	0302
Stoneleigh Abbey Water Pump	WAR Stoneleigh Abbey Estate, Stoneleigh	151 SP316711	Water:Pumping	O	A restored and working water pump located in the pump house on the Stoneleigh Abbey Estate. Built circa 1851, the pump used to supply water to the main house from the adjacent River Avon.	0387
Coundon Reservoirs, Cov'try	COV Scots Lane, Coundon, Coventry	140 SP319806	Water:Reservoirs	V	Three covered reservoirs constructed 1896-2011 to provide resilience to the Coventry potable water distribution system. Visible from Scots Lane. Reservoir No. 1 c. 59 x 74 m.; No. 2 59 x 74 m (out of use); No. 3 57 x 89 m. Heights vary 5.5 to 8 m. depending upon site gradient. Nos. 1 and 2 (1895) of brick construction with soil and grass cover; No. 3 (2011) (built on the location of a 1932 concrete reservoir) of reinforced and mass fill concrete construction with 250 mm. slab and a membrane/drainage sheet/sand/topsoil and grass cover. No. 1 is suffering ingress and is close to the end of its asset life. Population expansion and a lack of chlorination [at] Whitley (until 1915) pushed Coventry to seek further supplies. In 1907 a pipeline was built between Whitacre pumping station at Shustoke and Coundon to provide 2 - 3 million gallons per day.	0182

Shustoke Reservoir	NOR Shustoke, Warwickshire	140 SP227913	Water:Reservoirs	A	Shustoke drinking water reservoir consists of two pools. A 90 acre pool and an 8 acre settling pool. It holds 422 million gallons and is fed from the nearby rivers Bourne and Blythe. Water held is pumped to the nearby Whitacre Treatment plant. It was built by the Birmingham Waterworks Co. from 1879 to 1884. It quickly became inadequate for Birmingham and was replaced by the Elan Valley scheme. It then became an emergency supply only. Today it supplies Nuneaton, Bedworth, Atherstone and parts of Coventry. Recreational usres are the Shustoke Sailing Club, Shustoke Fly Fishers, biurdwatchers and walkers.	0363
Tile Hill Water Tower	COV Cromwell Lane, Coventry	140 SP272784	Water:Towers	V	This large prominent water tower was erected in 1932. It is a reinforced concrete tower with a capacity of 300,000 gallons. The tank is supported by a central shaft and prominent reinforced concrete ribs. It is now out of use.	0007
Corley Water Tower	NOR Corley, Church Lane	140 SP296851	Water:Towers	V	A sectional steel tank on a 50ft steel tower. 6000 gallons capacity. Built 1974.	0055
Bedworth Waterworks Tower	NUN Tower Road, Bedworth	140 SP354865	Water:Towers	V	Bedworth waterworks tower was built by the local authority to meet the increasing demand for water at the end of the 19th centiry. It is an impressive brick and terracotta building, some 45 metres tall, reminiscent of an Italian campanile. There is a large framed panel above the door with the inscription 'BEDWORTH WATERWORKS 1898'. It is currently (2016) emnpty, awaiting redevelopment.	0314
Tuttle Hill Water Tower	NUN On B4111 NW of Nuneaton.	140 SP340934	Water:Towers	V	A square reinforced concrete water tower built in 1938. Nicely decorated.	0074
Ashlawn Water Tower	RUG Off B4429, south of Rugby	140 SP507729	Water:Towers	V	Built in 1934 this water tower has a cirular reinforced concrete 500,000 gallon tank supported on 12 reinforced concrete columns.	0052

Deppers Bridge Water Tower	STR Deppers Bridge village	151 SP397594	Water:Towers	V	A square concrete water tower on four concrete legs. Built about 1920. Disused.	0062
Edge Hill Water Tower	STR On crest of Edge Hill near B4086	151 SP382483	Water:Towers	V	A large reinforced concrete water tower with a circular tank 49ft in diameter with two compartments supported by a central shaft and twelve columns 45ft high. 180,000 gallons capacity.	0047
Lye Green Water Tower	STR Lye Green village	151 SP197657	Water:Towers	V	Large reinforced concrete circular tank 35ft diameter supported by a central ribbed shaft. 70,000 gallons capacity, 60ft overall height. Supplies high ground in Claverdon area.	0066
Burton Green Water Tower	WAR On private land on a lane south of Burton Green.	140 SP268753	Water:Towers	V	Built about 1933, a reinforced concrete tower with a circular drum of 20,000 gallons capacity on four reinforced concrete columns. Now out of use.	0043
Lapworth Water Tower	WAR Lapworth Street, Lapworth	139 SP175710	Water:Towers	V	A relatively large water tower constructed in 1957. Capacity 200,000 gallons. A reinforced concrete (rc) drum tank with domed floor and supported on 8 rc columns. Circular rc wall about 8ft high around base. Central access shaft through drum. 77 ft high overall. Brick building at base of tower housing valves, sink, heater and remote level indicator. Telephone. Supplies N. end of former Warwick RDC north and west parishes network. Now has a new life in telecommunications with a considerable array of masts and dishes.	0352
Tainters Hill Water Tower	WAR Kenilworth, on Tainters Hill	140 SP290728	Water:Towers	V	This tower, now a house, was built in 1788 as a tower windmill. In 1854 the mill was converted to steam power and in 1884 was further converted into a water tower by placing a 26,000 gallon tank on the top of the tower. In 1925 the tank was replaced by one of 50,000 gallons capacity. The tower was derelict by the 1960s and in 1974 was converted to a dwelling by Architect E.R.Byron.	0046

Waterworks Manager's House,	COV Doe Bank Lane, Spon End, Coventry	140 SP323791	Water:Treatment	V	Constructed circa 1844, mainly sandstone. Originally the Manager's house for the once extensive Coventry City Waterworks. Now a private residence, the site was re-developed for housing after closure in the 1970s.	0370
Artesian Well House, Coventry	COV Cumbria Close, Spon End, Coventry	140 SP322791	Water:Wells	V	Coventry Water Act authorised the construction of a waterworks and a deep artesian well in Doe Bank Lane. The works were completed in 1847. Large pumping houses with tall chimneys have long since gone and the site is now re-developed as housing. The works closed in the 1970s.	0369
St. Catherine's Well, Coventry	COV Beaumont Crescent, Coundon , Coventry	140 SP322796	Water:Wells	V	A restored medieval chapel-like well of the Celtic type. Ashlar, gabled. Approximately 7 ft. by 5 ft. and 10 ft. high. Pointed arched opening. The well dates from the 15th C and at one time provided the west of the City with a supply of water, long since dried up.	0386
Water Pump, Stretton on Duns	RUG Plott Lane, Stretton on Dunsmore	140 SP403730	Water:Wells	A	Common land in Stretton was enclosed in 1704. This affected the village and a hamlet called The Plott was set up for labourers in Plott Lane. Although one cottage remains, the hamlet has virtually disappeared but the cast iron water pump commemorates the settlement.	0383
